Notice_content

Question #1: Since the EUT can only operate at 4 channels, frequency range will

be listed on the Grant will be 2413-2413MHz, 2432-2432MHz, 2451-2451MHz, and 2470-2470MHz. Please confirm.

Question #2: What was the frequency range investigated ?

For intentional radiator, the frequency range to be investigated shall be 10th harmonic of fundamental frequencies. The test equipment that you used for performing radiated emission tests can only go up to 6GHz. Please clearly state the frequency range of investigation.

Question #3: Please provide operational description.

Best Regards

Mike Kuo / TCB Certifier

The items indicated above

must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
