Jon

Just to confirm that Red-M wish to proceed with the FCC Part 15 application for the 3000AS and understand that in filing this application the RFI test report ref: RFI/EMCB1/RP41715C, will not be covered by the confidentiality agreement.

Thanks again for your help with this project.

Subject: Confidentiality

Dear Ben,

As I prepared the materials for uploading I have encountered an issue I need your confirmation on before I proceed.

Red M has requested confidentiality for their test report and made a rather strong case in the letter that they would be damaged severely if it was disclosed. The FCC will not allow any test report to be identified as confidential. If we file it will be available on the FCC web site for the world to download.

I have granted this application and I am required to upload the test report and all other exhibits within 5 days. If I do not hear from you within 2 days that the uploading of the test report is allowed by Red M, then I will withdraw the grant.

Normally I would have waited and asked, but I know Red M is under a lot of pressure to get this grant

and I anticipate that they will be willing to disclose the test report in order to gain access to the US market.

Jon.

Best regards
