# SAFETY PRECAUTIONS

---

Improper use can result in electric shock and/or fire. In order to prevent potential danger, please observe the following instructions when installing, operating and cleaning the product. To ensure your safety and prolong the service life of your color TFT-LCD monitor product, please read the following precautions carefully before using the product.

- \* All operating instructions must be read and understood before the product is operated.
- \* These safety and operating instructions must be kept in safe place for future reference.
- \* All warnings on the product and in the instructions must be observed closely.
- \* All operating instructions must be followed.
- \* Do not use attachments not recommended by the manufacturer. Use of inadequate attachments can result in accidents.
- \* This product must be operated on a power source specified on the specification label. If you are not sure of the type of power supply used in your home, consult your dealer or local power company. For units designed to operate on batteries or another power source, refer to the operating instructions.
- \* The power cords must be routed properly to prevent people from stepping on them or objects from resting on them. Check the cords at the plugs and product.
- \* If you plan to use a 12V DC power supply unit other than the AC adapter supplied with the product, make sure the power supply unit provides stable voltage with minimum fluctuations.
- \* Do not overload AC outlets or extension cords. Overloading can cause fire or electric shock.
- \* Never insert an object into the product through vents or openings. High voltage flows in the product, and inserting an object can cause electric shock and/or short internal parts. For the same reason, do not spill water or liquid on the product.
- \* Do not attempt to service the product yourself. Removing covers can expose you to high voltage and other dangerous conditions. Request a qualified service person to perform servicing.
- \* If any of the following conditions occurs, unplug the power cord from the AC outlet, and request a qualified service person to perform repairs.
  - a. When the power cord or plug is damaged.
  - b. When a liquid was spilled on the product or when objects have fallen into the product.
  - c. When the product has been exposed to rain or water.
  - d. When the product does not operate properly as described in the operating instructions.  
Do not touch the controls other than those described in the operating instructions.  
Improper adjustment of controls not described in the instructions can cause damage, which often requires extensive adjustment work by a qualified technician.
  - e. When the product has been dropped or damaged.
  - f. When the product displays an abnormal condition. Any noticeable abnormality in the product indicates that the product needs servicing.
- \* In case the product needs replacement parts, make sure that the service person uses replacement parts specified by the manufacturer, or those with the same characteristics and performance as the original parts. Use of unauthorized parts can result in fire, electric shock and/or other danger.
- \* Upon completion of service or repair work, request the service technician to perform safety checks to ensure that the product is in proper operating condition.
- \* When mounting the product on a wall or ceiling, be sure to install the product according to the method recommended by the manufacturer.

## SAFETY PRECAUTIONS (Continued)

---

- \* Unplug the power cord from the AC outlet before cleaning the product. Use a damp cloth to clean the product. Do not use liquid cleaners or aerosol cleaners.
- \* Unplug the power cord from the AC outlet if you do not use the product for considerably long time.
- \* Do not use the product near water, such as bathtub, washbasin, kitchen sink and laundry tub, swimming pool and in a wet basement.
- \* Keep the product away from direct rays of the Sun-light.
- \* Do not place the product on an unstable cart, stand, tripod or table. Placing the product on an unstable base can cause the product to fall, resulting in serious personal injuries as well as damage to the product. Use only a cart, stand, tripod, bracket or table recommended by the manufacturer or sold with the product. When mounting the product on a wall, be sure to follow the manufacturer's instruction. Use only the mounting hardware recommended by the manufacturer.
- \* When relocating the product placed on a cart, it must be moved with the utmost care. Sudden stops, excessive force and uneven floor surface can cause the product to fall from the cart.
- \* The vents and other openings in the cabinet are designed for ventilation. Do not cover or block these vents and openings since insufficient ventilation can cause overheating and/or shorten the life of the product. Do not place the product on a bed, sofa, rug or other similar surface, since they can block ventilation openings. This product is not designed for built-in installation; do not place the product in an enclosed place such as a bookcase or rack, unless proper ventilation is provided or the manufacturer's instructions are followed.
- \* The LCD panel used in this product is made of glass. Therefore, it can break when the product is dropped or applied with impact. Be careful not to be injured by broken glass pieces in case the LCD panel breaks.
- \* Keep the product away from heat sources such as radiators, heaters, stoves and other heat-generating products (including amplifiers).
- \* The LCD Panel is a very high technology product with 3,932,160 thin film transistors, giving you fine picture details. Occasionally, a few non-active pixels may appear on the screen as a fixed point of blue, green or red. Please note that this does not affect the performance of your product.

# INTERNATIONAL STANDARDS

---

## FCC

**CAUTION** : Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## CE

EN55022 "Limits and methods of measurement of radio disturbance characteristics of information technology equipment (ITE)"

EN55024 "Information technology equipment - Immunity characteristics - Limits and methods of measurement"

EN61000-3-2 "Limits for harmonic current emissions (equipment input current  $\leq 16\text{A}$  per phase)"

EN61000-3-3 "Limitation of voltage fluctuations and flicker in low-voltage supply system for equipment with rated current  $\leq 16\text{A}$ "

## MIC

### **"B" Device**

This product has been passed EMI standard test therefore, it is available for official uses and all other areas (A Device is for official uses only and B Device has less).

## SUPPLIED ACCESSORIES

Make sure the following accessories are provided with the product.

Quick Install Guide (\*1)

Operation Manual  
Monitor Driver (CD\*1)

Remote Control (\*1)

Size AAA Battery (\*2)

AC Adapter (\*1)

AC Cord (\*1)

TV Tuner (\*1)

## PREPARATION - Remote Control

---

- \* Use the remote control by pointing it towards the remote sensor window.  
Objects between the remote control and sensor window may prevent proper operation.

### Cautions regarding use of remote control

- \* Do not expose the remote control to shock. In addition, do not expose the remote control to liquids, and do not place in an area with high humidity.
- \* Do not install or place the remote control under direct sunlight. The heat may cause deformation of the unit.
- \* The remote control may not work properly if the remote sensor window of the main unit is under direct sunlight or strong lighting. In such case, change the angle of the lighting or LCD TV monitor set, or operate the remote control closer to the remote sensor window.

### Batteries for Remote Control

If the remote control fails to operate LCD TV monitor functions, replace the batteries in the remote control.

- 1 Open the battery cover.
- 2 Insert batteries (two Size-AAA batteries, Supplied with product).
  - \* Place batteries with their terminals corresponding to the (+) and (-) indications in the battery compartment.
- 3 Close the battery cover

### Cautions regarding batteries

Improper use of batteries can result in a leakage of chemicals and/or explosion. Be sure to follow the instructions below.

- Place batteries with their terminals corresponding to the (+) and (-) indications.
- Different types of batteries have different characteristics. Do not mix batteries of different types.
- Do not mix old and new batteries. Mixing old and new batteries can shorten the life of new batteries and/or cause old batteries to leak chemicals.
- Remove batteries as soon as they are non-operable. Chemicals that leak from batteries can cause a rash. If chemical leakage is found, wipe with a cloth.
- The batteries supplied with the product may have a shorter life expectancy due to storage conditions.
- If the remote control is not used for an extended period of time remove batteries from the remote control

## PREPARATION – TV Tuner(Optional)

---

### TV Tuner Installation

Note : The screw bolt is in the screw hole of TV tuner.  
The figure is just to illustrate that there is a bolt to secure the tuner.

## PREPARATION – Cable Connection

### Cable Connector Description

1 Power Input : DC 12V

2 Analog RGB : PC VGA Cable

3 S-Video

4 Composite Video : Yellow

5 Video Sound (L) : White

6 Video Sound (R) : Red

7 PC Stereo Input

8 Headphone Output

9 Line Out : Connect to another speaker set

10 Antenna

### VGA, Power & Antenna Cable Connection

## PREPARATION- Stand, Arm, Wall Mount

---

### Stand Installation (Standard)

### Arm Installation

### Wall Mount Bracket Installation

Note : Arm and wall mount bracket are not supplied with the product

# LOCATION OF USERS CONTROL

## Control Panel on the front of main unit

**1 PIP On / PIP Source Switch :** PIP will be on when pressed once. Signal source of PIP will be changed in sequence as the button is pressed. PIP will be off when Exit key is pressed.

**PIP Sequence**

**TV Video S-Video**

**2 Signal Source Select :** Signal source will be selected in sequence as the button is pressed.

**PC TV Video S-Video**

**3 Menu :** Display the menu window and used as Select button.

**4 Exit :** Return to previous OSD menu or exit from OSD menu window.

**5 Channel down / Move down :** Channel down or move downward in OSD menu.

**6 Channel up / Move up :** Channel up or move upward in OSD menu.

**7 Decrease volume / Move left :** Volume down or move leftward in OSD menu.

**8 Increase volume / Move right :** Volume up or move rightward in OSD menu.

**9 Power Indicator :**

| Mode       | LED Display | Remark              |
|------------|-------------|---------------------|
| Power on   | Green LED   | -                   |
| Power off  | Orange LED  | No Signal (PC mode) |
| Switch Off | Dark LED    | -                   |

**10 Power On / Off**

# REMOTE CONTROL

## Remote Control

# MONITOR INSTALLATION

1 Double click **[Control Panel]** icon from **[My Computer]** folder.

2 Double click **[Display]** icon from **[Control Panel]** folder.

3 Select **[Settings]** in **[Display Properties]** window.

4 Click **[Advanced...]**.

5 Select **[Monitor]** in the window shown above.

6 Click **[Properties]**.

## MONITOR INSTALLATION(Continued)

**7** Select **[Driver]** and then click **[Update Driver...]**.

**8** **[Upgrade Device Driver Wizard]** will be appeared. Select the **second list** and then click **[Next>]**.

**9** Click **[Have Disk...]**.

**10** When drive **[A:]** appears in default, click **[Browse ..]** to select CD-ROM drive.

## MONITOR INSTALLATION(Continued)

**11** Double click the **[Driver]** folder.

**12** Choose **TM170.inf** file then click **[Open]**.

**13** Click **[OK]** to proceed to the next step.

**14** Choose **Envision LCD Monitor TM170**, then click **[Next>]** to proceed to the next step.

**15** Click **[Next>]** to start installation.

**16** Click **[Finish]**.  
(Be sure the screen shows correct model name.)

# STATUS INFORMATION

## Status Information
