April 17, 2014

Subject: Permissive Change notice
FCC ID: PGRPX031ANI

To whom it may concern:

This Permissive Change notification is a consequence of modifying the Audio/Video outputs on the original design (Model PX031ANI) to create a new Model IPW9001. The PCB layout was changed only on AV circuit to accommodate additional A/V outputs. The HDMI input port which was on the original product was removed. A TV RF output port, Component output port, Composite output port, and a SPDIF Digital optical audio output port were added.

None of the changes impact the original RF4CE block diagram, operational description, frequencies, or TX power settings. The RF4CE circuits remain electrically identical and nothing has been changed with respects to the RF4CE PCB layout verses the original submittal.

Sincerely,

A handwritten signature in black ink that reads "Mark A. Rieger".

Mark A. Rieger
