- Line-in Jack

ANATOMY

Function

Action

Play/Pause/ Answer/Hang Up	Press the MFB
Raise Volume	Press the volume up button
Lower Volume	Press the volume down button
Skip Forward	Press the skip forward button
Skip Back	Press the skip back button
Voice Command/Siri	Short Press the MFB & volume up button simultaneously

■ POWER UP

For best results, fully charge your Tuis before use.

For a full charge, plug the Tuis into your wall charger or computer via micro USB cable.

The LED indicator located below the right ear piece will flash red to indicate a low battery.

NOTE: It takes 3 hours to give your Tuis a full charge.

Power On/Off

ON: Press and Hold the MFB  until you see a blue LED flashing to power on the device.

OFF: In standby mode, hold the MFB  until you see the red LED flashing to power off the device.

■ PAIRING

Entering Pairing Mode

1. When the headset is off, press and hold the MFB  down until the LED flashes red and blue alternately.
2. Release "button," you are now in pairing mode.

Pair

Go to your device's Bluetooth settings

ADD or SEARCH devices.

When "ODT TUIS" appears, select it.

*If asked for a pass code: Enter "0000"

After successfully connecting, the blue LED will flash twice every 4 seconds.

You should now be able to play music & make/receive calls using the headset. Hooray.

Reconnecting

Automatic: Every time the headset is turned on, it will connect to its most recent device automatically.

Manual: If it doesn't connect on standby short press any button once to connect.

TALK

The following are tips on how to use your Tuis to talk on the phone:

Answer/ Cancel a call	Press the MFB

Weight: 173g

■ FAQ

1. Why is the LED flashing red twice every 30 seconds?

The battery is low. Recharge it.

2. Why is the red LED off when charging?

- A. Make sure the connection between the charging cable and the Tuis is tight.
- B. If the Tuis haven't been used in awhile, the light may not come on immediately. Charge the battery for at least 30 minutes.

3. Why cant I pair my Tuis?

Your Bluetooth device and the chips must both be in pairing mode.

4. Why can't I hear the sound on the headset?

- A. Make sure the Tuis are on.
- B. Make sure the volume is not too low or muted.
- C. Make sure the Tuis are properly connected with your device.
- D. Make sure the Tuis are within range of your device.

5. Why can't I hear the sound clearly on the headset?

- A. Move your Tuis closer to your device.
- B. Make sure your Tuis are charged up.
- C. Turn off your Tuis and device, then power up and reconnect.

6. Why the pause/play, last/next song not function when playing music?

Make sure your Bluetooth device supports AVRCP (Audio/Video Remote Control profile)

CARE & MAINTENANCE

- Keep the Tuis dry.
- Keep the Tuis away from direct sunlight or hot places. High temperatures will shorten the life of electronic devices, destroy the battery or distort certain plastic parts.
- Do not try to disassemble the Tuis.
- Do not let the Tuis fall onto the floor or other hard surfaces. The internal circuit board may get damaged.
- Do not use intensive chemical products or detergent to clean the product.
- Do not scratch the surface with sharp things.

■ FCC Statement

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected

■ Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
