

Engineering Test Report No. 2203205-02 Rev A

Report Date	February 23, 2023	
Manufacturer Name	Industrial Scientific Corporation	
Manufacturer Address	1 Life Way Pittsburgh, PA 15205	
Test Item Name Model No.	Model Version: RGX-4G 1810-9509	
Date Received	January 18, 2023	
Test Date	January 18, 2023	
Specifications	FCC "Code of Federal Regulations" Title 47, Part 15, Subpart B FCC "Code of Federal Regulations" Title 47 Part 15, Subpart C, Section 15.225 Innovation, Science, and Economic Development Canada, RSS-GEN Innovation, Science, and Economic Development Canada, RSS-210	
Test Facility	Elite Electronic Engineering, Inc. 1516 Centre Circle, Downers Grove, IL 60515	FCC Reg. Number: 269750 IC Reg. Number: 2987A CAB Identifier: US0107
Signature		
Tested by	Tylar Jozefczyk	
Signature		
Approved by	Raymond J. Klouda, Registered Professional Engineer of Illinois – 44894	
PO Number	400310313	

This report is for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence, provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents.

This report shall not be reproduced, except in full, without the written approval of Elite Electronic Engineering Inc.

Elite Electronic Engineering Incorporated certifies that the information contained in this report was obtained under conditions which meet or exceed those specified in the FCC "Code of Federal Regulations" Title 47 Part 15, Subpart C, Section 15.225 and Innovation, Science, and Economic Development Canada, RSS-210 test specifications. The data presented in this test report pertains to the EUT on the test date specified. Any electrical or mechanical modifications made to the EUT subsequent to the specified test date will serve to invalidate the data and void this certification. This report must not be used to claim product certification, approval, or endorsement by A2LA, NIST, or any agency of the Federal Government.

1. Report Revision History

Revision	Date	Description
–	27 FEB 2023	Initial Release of Engineering Test Report No.2203205-02
A	27 FEB 2023 By RK	- On the cover and throughout report: Added Rev A to the report number in the header of each page. - Section 19, Page 12: Added RSS 210 limits. - Corrected ISED data sheet.

2. Introduction

2.1. Scope of Tests

This document presents the results of a series of RF emissions tests that were performed on the Industrial Scientific Corporation RGX Gateway 4G (hereinafter referred to as the Equipment Under Test (EUT)). The EUT was manufactured and submitted for testing by Industrial Scientific Corporation located in Pittsburgh, PA.

2.2. Purpose

The test series was performed to determine if the Industrial Scientific Corporation RGX Gateway 4G meets the Class II Permissive Change requirements of the FCC "Code of Federal Regulations" Title 47, Part 15, Subpart C, §15.225.

The test series was also performed to determine if the Industrial Scientific Corporation RGX Gateway 4G meets the Class II Permissive Change requirements of the Innovation, Science, and Economic Development Canada Radio Standards Specification RSS-Gen and RSS-210 for Transmitters.

The following modification has been made to the original equipment:

- A new 4G modem (Nimbelink / NL-SWLTE-TC1WWG, FCC ID RI7LE910CXWWX) was added to the EUT.

Testing was performed in accordance with ANSI C63.10-2013.

2.3. Identification of the EUT

The EUT was identified as follows:

EUT Identification	
Product Description	Model Version: RGX-4G
Model/Part No.	1810-9509
Serial No.	2211014-001
Size of EUT	11" x 9" x 6"
Software/Firmware Version	3.0.b05

The EUT listed above was used throughout the test series.

3. Power Input

The EUT obtained 120VAC 60Hz power via a 3-wire, 1-meter, unshielded power cord.

4. Grounding

The EUT was connected to ground through the third wire of its input power cord.

5. Support Equipment

The EUT was submitted for testing along with the following support equipment:

Description	Model #	S/N
Laptop	---	---

6. Interconnect Leads

No interconnect leads were used during the tests.

7. Modifications Made to the EUT

No modifications were made to the EUT during the testing.

8. Mode of Operation

The EUT was energized, and was programmed to transmit in the following mode:

Mode	Description
NFC	Transmits at 13.56MHz

9. Test Specifications

The tests were performed to selected portions of, and in accordance with, the test specifications.

- Federal Communications Commission "Code of Federal Regulations", Title 47, Chapter I, Subchapter A, Part 15, Subpart C, Section 225 – "Operation within the band 13.110-14.010 MHz"
- ANSI C63.10-2013 – "American National Standard of Procedures for Compliance Testing of Unlicensed Wireless Devices"
- Radio Standard Specification RSS-Gen Issue 5, Amendment 2, February 2021 – "General Requirements for Compliance of Radio Apparatus"
- Radio Standard Specification RSS-210 Issue 10, Amendment 2, April 2020 – "License-Exempt Radio Apparatus: Category I Equipment"

10. Test Plan

No test plan was provided. Instructions were provided by personnel from Industrial Scientific Corporation and used in conjunction with the FCC "Code of Federal Regulations" Title 47 Part 15, Subpart C, Section 15.225, Innovation, Science, and Economic Development Canada, RSS-210, and ANSI C63.10-2013 specifications.

11. Deviations, Additions to, or Exclusions from Test Specifications

There were no deviations, additions to, or exclusions from the test specifications during this test series.

12. Laboratory Conditions

The ambient parameters of the laboratory during testing were as follows:

Ambient Parameters	Value
Temperature	21.9°C
Relative Humidity	21%
Atmospheric Pressure	1003.5mb

13. Summary

The following EMC tests were performed, and the results are shown below:

Test Description	Requirements	Test Method	Results
Radiated Emissions	FCC 15.225 ISED RSS-210	ANSI C63.10:2013	Conforms

14. Statement of Conformity

The Industrial Scientific Corporation RGX Gateway 4G (Model No. 1810-9509, Serial No. 2211014-001) did fully conform to the selected requirements of FCC "Code of Federal Regulations" Title 47 Part 15, Subpart C, Section 15.225 and Innovation, Science, and Economic Development Canada, RSS-210.

15. Certification

Elite Electronic Engineering Incorporated certifies that the information contained in this report was obtained under conditions which meet or exceed those specified in the FCC "Code of Federal Regulations" Title 47 Part 15, Subpart C, Section 15.225 and Innovation, Science, and Economic Development Canada, RSS-210 test specifications. The data presented in this test report pertains to the EUT on the test date specified. Any electrical or mechanical modifications made to the EUT subsequent to the specified test date will serve to invalidate the data and void this certification.

16. Photographs of EUT

17. Equipment List

Eq ID	Equipment Description	Manufacturer	Model No.	Serial No.	Frequency Range	Cal Date	Due Date
CDZ3	LAB WORKSTATION	ELITE	LWS-10		WINDOWS 10	CNR	
NLS1	24" ACTIVE LOOP ANTENNA	EMCO	6502	8903-2329	0.01-30MHZ	8/31/2022	8/31/2024
NTA3	BILOG ANTENNA	TESEQ	6112D	32853	25-1000MHz	11/17/2022	11/17/2024

SAA1	AC POWER SOURCE/ANALYZER	HEWLETT PACKARD	6813A	3524A-00446	0-300VRMS, 1750VA	NOTE 1	
WKA1	SOFTWARE, UNIVERSAL RCV EMI	ELITE	UNIV_RCV_EMI	1	---	I/O	

N/A: Not Applicable

I/O: Initial Only

CNR: Calibration Not Required

NOTE 1: For the purpose of this test, the equipment was calibrated over the specified frequency range, pulse rate, or modulation prior to the test or monitored by a calibrated instrument.

18. Block Diagram of Test Setup

Radiated Measurements Test Setup

19. Radiated Emissions

EUT Information	
Manufacturer	Industrial Scientific Corporation
Product	RGX Gateway 4G
Model No.	1810-9509
Serial No.	2211014-001
Mode	NFC

Test Setup Details	
Setup Format	Tabletop
Height of Support	N/A
Type of Test Site	Semi-Anechoic Chamber
Test Site Used	R29F
Type of Antennas Used	Below 30MHz: Loop (or equivalent) Below 1GHz: Bilog (or equivalent)
Notes	N/A

Measurement Uncertainty	
Measurement Type	Expanded Measurement Uncertainty
Radiated disturbance (electric field strength on an open area test site or alternative test site) (30 MHz – 1000 MHz)	4.3

Requirements
The EUT must comply with the requirements of FCC "Code of Federal Regulations Title 47", Part 15, Subpart C, Section 15.225 and 15.209, as well as the requirements of the RSS-GEN Section 8.9.

FCC 15.209 Emissions Limits		
Carrier Frequency (MHz)	Field Strength of Emissions ($\mu\text{V/m}$)	Measurement Distance (m)
0.009 – 0.490	$2400/f(\text{kHz})$	300
0.490 – 1.705	$24000/f(\text{kHz})$	30
1.705 – 30.0	30	3
30 – 88	100	3
88 – 216	150	3
216 – 960	200	3
Above 960	500	3
FCC 15.225 Emissions Limits		
Carrier Frequency (MHz)	Field Strength of Emissions ($\mu\text{V/m}$)	Measurement Distance (m)
13.553 – 13.567	15848	30
13.410 – 13.553	334	30
13.567 – 13.710	334	30
13.110 – 13.410	106	30
13.710 – 14.010	106	30

RSS-Gen Table 5 – General Field Strength Limits at Frequencies Above 30 MHz		
Frequency (MHz)	Field Strength (µV/m at 3m)	
30 – 88	100	
88 – 216	150	
216 – 960	200	
Above 960	500	
RSS-Gen Table 6 – General Field Strength Limits at Frequencies Below 30 MHz		
Frequency	Field Strength of Emissions (µA/m)	Measurement Distance (m)
9 – 490kHz ¹	6.37/F (F in kHz)	300
490 – 1705kHz	63.7/F (F in kHz)	30
1.705 – 30MHz	0.08	30
Note 1: The emission limits for the ranges 9 – 90kHz and 110 – 490kHz are based on measurements employing a linear average detector.		
RSS 210 Emissions Limits		
Carrier Frequency (MHz)	Field Strength of Emissions (µV/m)	Measurement Distance (m)
13.553 – 13.567	15848	30
13.410 – 13.553	334	30
13.567 – 13.710	334	30
13.110 – 13.410	106	30
13.710 – 14.010	106	30

Procedure
Radiated measurements were performed in a 32ft. x 20ft. x 18ft. hybrid ferrite-tile/anechoic absorber lined test chamber. The walls and ceiling of the shielded chamber are lined with ferrite tiles, with anechoic absorber material is installed over the ferrite tiles. The floor of the chamber is used as the ground plane. The chamber complies with ANSI C63.4-2014 for site attenuation. The shielded enclosure prevents emissions from other sources, such as radio and TV stations from interfering with the measurements. All powerlines and signal lines entering the enclosure pass through filters on the enclosure wall. The powerline filters prevent extraneous signals from entering the enclosure on these leads. A preliminary radiated emissions test was performed to determine the emission characteristics of the EUT. For the preliminary test, a broadband measuring antenna was positioned at a 3-meter distance from the EUT. The EUT was placed on an 80cm high non-conductive stand. The entire frequency range from 10kHz – 200MHz was investigated using a peak detector function. The data was then processed by the computer to calculate equivalent field intensity. The final emission tests were then manually performed over the frequency range of 10kHz – 200MHz. Between 10 – 30MHz, a loop antenna was used as the pick-up device, with a peak detector with a resolution bandwidth of 10kHz used on the spectrum analyzer. Between 30 – 200MHz, a bi-log antenna was used, with a peak detector with a resolution bandwidth of 100kHz used on the spectrum analyzer. The peak detected levels were converted to average levels using a duty cycle factor which was computed from the pulse train. To ensure that maximum or worst case, emission levels were measured, the following steps were taken: 1) To ensure that maximum or worst case emission levels were measured, the following steps were taken when measuring the fundamental emissions and the spurious emissions: a) The EUT was rotated so that all of its sides were exposed to the receiving antenna. b) Since the measuring antenna is linearly polarized, both horizontal and vertical field components

were measured.

- c) The measuring antenna was raised and lowered for each antenna polarization to maximize the readings.
- d) In instances where it was necessary to use a shortened cable between the measuring antenna and the spectrum analyzer, the measuring antenna was not raised or lowered to ensure maximized readings. Instead, the EUT was rotated through all axis to ensure the maximum readings were recorded for the EUT.

Test Setup for Spurious Radiated Emissions, 10 – 30MHz – Antenna Polarization
Horizontal

Test Setup for Spurious Radiated Emissions, 10 – 30MHz – Antenna Polarization
Vertical

Test Setup for Spurious Radiated Emissions, 30MHz – 1GHz – Antenna
Polarization Horizontal

Test Setup for Spurious Radiated Emissions, 30MHz – 1GHz – Antenna
Polarization Vertical

Test Technology:

OIA (Over the Air) Performance
GSM, GPRS, EGPRS
UMTS (W-CDMA)
LTE including CAT M1
A-GPS for UMTS/GSM
LTS A-GPS, A-GLONASS,
SIB8/SIB16
Large Device/Laptop/Tablet Testing
Integrated Device Testing
WiFi 802.11 a/b/g/n/a

Test Method(s) ¹:

CTIA Test Plan for Wireless Device Over-the-Air
Performance (Method for Measurement for Radiated Power
and Receiver Performance) V3.8.2;
CTIA Test Plan for RF Performance Evaluation of WiFi
Mobile Converged Devices V2.1.0

Electrical Measurements and Simulation
AC Voltage / Current

(1mV to 5kV) 60 Hz
(0.1V to 250V) up to 500 MHz
(1μA to 150A) 60 Hz

FAA AC 150/5345-10H
FAA AC 150/5345-43J
FAA AC 150/5345-44K

DC Voltage / Current

(1mV to 15-kV) / (1μA to 10A)

FAA AC 150/5345-46E

Power Factor / Efficiency / Crest Factor
(Power to 30kW)

FAA AC 150/5345-47C
FAA EB 67D

Resistance

(1mΩ to 4000MΩ)

Surge

(Up to 10 kV / 5 kA) (Combination
Wave and Ring Wave)

On the following products and materials:

Telecommunications Terminal Equipment (TTE), Radio Equipment, Network Equipment, Information Technology Equipment (ITE), Automotive Electronic Equipment, Automotive Hybrid Electronic Devices, Maritime Navigation and Radio Communication Equipment and Systems, Vehicles, Boats and Internal Combustion Engine Driven Devices, Automotive, Aviation, and General Lighting Products, Medical Electrical Equipment, Motors, Industrial, Scientific and Medical (ISM) Radio-Frequency Equipment, Household Appliances, Electric Tools, Low-voltage Switchgear and Control gear, Programmable Controllers, Electrical Equipment for Measurement, Control and Laboratory Use, Base Materials, Power and Data Transmission Cables and Connectors

¹ When the date, edition, version, etc. is not identified in the scope of accreditation, laboratories may use the version that immediately precedes the current version for a period of one year from the date of publication of the standard measurement method, per part C., Section 1 of A2LA R101 - General Requirements - Accreditation of ISO-IEC 17025 Laboratories.

² Accreditation does not imply acceptance to the FCC equipment authorization program. Please see the FCC website (<https://apps.fcc.gov/oetcf/eas/>) for a listing of FCC approved laboratories.

Accredited Laboratory

A2LA has accredited

ELITE ELECTRONIC ENGINEERING INC.

Downers Grove, IL

for technical competence in the field of

Electrical Testing

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017 *General requirements for the competence of testing and calibration laboratories*. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

Presented this 19th day of May 2021.

A handwritten signature in blue ink, appearing to be 'A. [unclear]', written over a horizontal line.

Vice President, Accreditation Services
For the Accreditation Council
Certificate Number 1786.01
Valid to June 30, 2023

For the tests to which this accreditation applies, please refer to the laboratory's Electrical Scope of Accreditation.
