

CAUTION-ELECTRIC TOY NOT RECOMMENDED FOR CHILDREN UNDER 3 YEARS OF AGE. AS WITH ALL ELECTRIC PRODUCTS, PRECAUTIONS SHOULD BE OBSERVED DURING HANDLING AND USE TO PREVENT ELECTRIC SHOCK. INQUIRY: TYCO, 100A GOLF, OMAHA, NE 68138, U.S.A.

BATTERY CHARGING/CARE - 9.6V TURBO™ BATTERY

Please follow these instructions regarding NiCd vehicle battery charging and safety. Use charger only under adult supervision.

1. Plug wall pack charger into standard 110/120 volt outlet.
2. Connect the wires leading from the battery pack to the wall pack charger connector. Make certain the two connectors are tightly snapped together.
3. To disconnect wires, push down on the connector clip and pull apart.
4. Your battery pack consists of new parts and materials; therefore, you should charge the battery pack for 5 1/2 hours the first two times you charge the battery. Subsequent charges will require only 4 hours.
5. After charging for 4 hours, the battery will feel warm. This condition is normal for fully charged batteries.
6. Charging the battery pack for more than 4 hours will not give you a longer running time. 4 hours is all that is required for a fully charged battery pack.

7. Unlike alkaline batteries, where the power loss is gradual, a NiCd (nickel-cadmium) battery will run for its normal running time, depending on your particular vehicle, and then lose most of its power at once. It is time to recharge the battery pack. Running time will vary, depending upon which R/C vehicle you have.

8. After use, the battery pack will be hot! Wait at least 20 minutes until the battery pack cools before recharging. Recharging a warm or hot battery pack will greatly reduce the number of times your battery pack can be recharged.

THIS PRODUCT USES A NICKEL-CADMIUM RECHARGEABLE BATTERY PACK. BATTERY MUST BE RECYCLED OR DISPOSED OF PROPERLY. FOR FURTHER INFORMATION REGARDING BATTERIES OR THEIR DISPOSAL PLEASE CALL 1-888-557-TYCO.

Note to Adults:

- Remove rechargeable batteries before recharging. Recharge batteries only under adult supervision.
- Regularly examine for damage to the plug, enclosure and other parts. In the event of any damage, the toy must not be used with the transformer until the damage has been repaired.
- This toy is not intended for children under 5 years old. The transformer is not a toy.

- DO NOT RECHARGE BATTERY PACK IF IT'S HOT. ALLOW IT TO COOL BEFORE RECHARGING.
- DO NOT RECHARGE A BATTERY PACK THAT SHOWS LEAKAGE OR CORROSION.
- DO NOT DISASSEMBLE THE BATTERY PACK. THE BATTERY PACK IS A SEALED RECHARGEABLE NICKEL-CADMIUM BATTERY.
- DO NOT DISPOSE OF THE BATTERY PACK IN FIRE.
- EXERCISE CAUTION IN HANDLING A HOT BATTERY PACK.
- IF BATTERY PACK AND/OR CHARGER ARE WET, THOROUGHLY DRY BEFORE CHARGING.
- DO NOT RECHARGE NON-RECHARGEABLE BATTERIES.

Refer to label on transmitter and vehicle for frequency. Do not race vehicles with the same frequency.

please follow the specific instructions in this manual

1. Rotate battery latch to open position. Open battery door.

2. Insert battery pack into battery compartment as shown.
3. Plug wire connector securely into battery compartment as shown.
4. Close battery door. Rotate battery latch to locked position.
5. To remove battery pack, turn latch, open battery door, unplug wire connector and lift battery out.

1. To install transmitter battery, open battery door as shown.
2. Install one 9V battery with polarity (+/-) as shown inside battery compartment.
3. Push the battery door forward and snap shut.
