Subject: Hyundai ImageQuest Co., Ltd., FCC ID: PJIES130, Assessment NO.: AN04T4149, Notice#1

Question #1: Based upon the functional block diagram, the highest frequency used or generated by this device is 110MHz . Per section 15.33 (b)(1) of FCC rules, the upper frequency range to be investigated shall be 2000 MHz. However, as indicated in the test report, the highest frequency range investigated is up to 1000 MHz only. Please provide radiated spurious emission data per section 15.109 requirement from 1000 MHz to 2000 MHz.

Best Regards

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
