The image shows the interior of a metal enclosure with various electronic components. At the top, there is a terminal block with red and black wires connected to it. A label next to the terminal block indicates a voltage of +48V. Below the terminal block, there is a digital display showing the number 8.8. To the right of the display, there are several connectors, including a D-sub connector and a multi-pin connector. The enclosure is made of metal and has a recessed area for the components.
