Dear Mr Cobb,

RE: FCC Permissive Change for Model: RK1/RC

This letter is to clarify the changes made between the currently approved 2.5GHz V4 Node B Model: RK/RA and the modified version Model: RK1/RC.

The Radio Shelf Model: RK1 is identical in all respects to RK with the exception that the enclosure design has been changed. Model: RK uses a chassis constructed of steel whereas Model: RK1 uses an aluminium chassis.

The Digital Shelf Model: RA has been modified with a) a chassis made of aluminium instead of steel and b) the addition of 2 daughter cards fitted to the main digital board to provide increased capacity. Each daughter card has a separate processor board fitted, this processor board is identical in all respects to the one fitted to the main digital board in Model: RA. This upgraded unit is known as Model: RC.

Yours sincerely

Peter Warburg
Technical Associate
