Dear Tim,

For (1) and (3), I can only tell you that the information I have is given by our customer and also from the testing sample we have. I will ask our customer to revise the information on their web site

For (2), I think Vivi has update the users manual.

For (4), is there any rule part asking us to list the detail ?? We have done a lot of EIRP testing in Europe standard. We all use the same procedures. Do you think it is a mandatory to list all the detail ???

Best Regards,

Dr. Alan Lane
