

QUARTERWAVE ANTENNAS

Our most inexpensive mobiles receive our most detailed attention, with a brass button contact and new heavy duty specially formulated Stand-Up™ grommet. Whatever your mobile communications need, can be sure that **ANTENEX** has a solution for you.

QW800, QWB800, QW450, QWB450, QWB8063, QWB8063
Inset: Stand-up™ Grommet, Inset: Brass Contact

Technical Data - Product Features & Information

- Gain:** Unity for 1/4 wave antennas and 3 dB for open coil flexible models.
- Frequency Range:** See model.
- SWR:** <2.0:1
- Maximum Power:** 200 watts
- Bandwidth @2.0:1:** QW152 - 18 MHz QW450 - 80 MHz
QWB800 - 150 MHz QWB8253 - 40 MHz
- Impedance:** 50 ohms
- Tuning:** Mid-band is standard. Custom tuning is available.
- Mounting Base:** Brite or black chrome plated brass locking nut.
- Radiator:** Type 302 stainless steel. Electropolished or black chrome plate on open coil collinears. Brite drawn finish or black chrome plate on quarterwaves
- Contact:** Brass button
- Mounts to:** 3/4" hole, 3/8" hole, Magnetic & Mini-Trunk mounts

BLANK	Cable Length	Blank = 12 ft is standard on magnetic mounts. *** = User defined length.

Our magnetic mounts are the ideal way to temporarily install antennas in a vehicle. Corrosion resistant materials, a complete weather seal, and a strong magnet ensure that your mount will continue to perform for years. This product may be changed in the field for servicing or cable replacement. All magnetic mounts ship standard with a protective mylar sole. We provide, as an option or for replacement, a protective rubber boot (model GRO) which also helps to protect the mount surface.

"I like the ANTENEX® mounts because of the quality and ease of installation" Jim, Communications Specialists.

Technical Data - Product Features & Information

- 3/4" magnetic mounts are made with brass, ceramic, & steel materials.
- Cable connection is triple reinforced to eliminate cable pull out.
- Magnet is rated at 90 lbs. pull strength. GM mag is rated at 55 lbs. min. mag for portable antennas is rated at 15 lbs. Very adequate for high speed pursuit vehicles.
- 100% continuity and resistance tested.
- Small high performance contact is standard. Large contact is available upon request.
- Protective rubber boot is available.
- Cable is field replaceable.
