

Skywatch TRC899 FCC Label Information

The Skywatch HP unit will have a tag that looks like this:

Note that the tag shows X's in the field. We will put in the appropriate identifiers when we are granted an identifier from the FCC.

A picture of the Skywatch TRC899 with the tag is shown before. A tag like the one above will replace the tag on the unit in the photograph. (The tag on the unit below does not have the FCC ID code on it, but it will when we are granted one by the FCC).
