Technical Note

Subject: Trimble Lassen™ LP GPS Receiver Board
Author/Editor: Andrew F Hare
Status: Issue 1
Date: 2 August 2002

No schematic is available for the Trimble Lassen™ LP GPS Receiver Board, being an OEM product. Please note that this board is mounted above the Node Controller ATM155 daughter board. It does connect to the Node Controller board.

A photograph of the Electronic Power Controller board shows the detail of the labelling. This area of the board was designed for mounting the GPS receiver board during prototype development, but is no longer used.
