Date of Listing: September 20, 2000

Gentlemen:

Your submission of the description of the subject measurement facility has been reviewed and found to be in compliance with the requirements of Section 2.948 of the FCC Rules. The description has, therefore, been placed on file and the name of your organization added to the Commission's list of facilities whose measurement data will be accepted in conjunction with applications for Certification under Parts 15 or 18 of the Commission's Rules. Please note that this filing must be updated for any changes made to the facility, and at least every three years from the date of listing the data on file must be certified as current.

If requested, the above mentioned facility has been added to our list of those who perform these measurement services for the public on a fee basis. An up-to-date list of such public test facilities is available on the Internet on the FCC Website at WWW.FCC.GOV, E-Filing, OET Equipment Authorization Electronic Filing.

Transmitter: 12Vdc Battery
Receiver: N/A

METHODS OF MEASUREMENT

Transmitter:

The transmitter was placed on a one meter high non-metallic turntable. The EUT was unmodified sample, as supplied by the manufacturer. All emissions were measured and recorded.

The turntable was rotated through 360 degrees, while the receiving antenna, at three (3) meters from the EUT, was varied in height from 1 to 4 meters, to find the maximum signal strength. The measured level was converted to a field strength using the antenna correction factors and cable losses. The equipment was tested in three (3) orthogonal planes.

PEAK TO AVERAGE RATIO

The peak to average ratio was measured and calculated as follows:

One complete cycle was 18 mS (refer to Graph A)

Pulse 1 has an ON time of 0.184 mS (refer to Graph B) and an OFF time of 0.576 mS (refer to Graph C).

Pulse 2 has an ON time of 0.944 mS (refer to Graph D) and an OFF time of 0.2 mS (refer to Graph E).

Pulse 3 has an ON time of 0.552 mS (refer to Graph F) and an OFF time of 0.2 mS (refer to Graph G).

The total number of pulses in one cycle is 20 Pulse 1 + 1 Pulse 2 + 3 Pulse 3 (refer to Graph A).

The total number of ON pulses is $20 \times 0.184 \text{ mS} + 1 \times 0.944 \text{ mS} + 3 \times 0.552 \text{ mS} = 6.28 \text{ mS}$

The peak to average ratio is the total ON time (6.28 mS) divided by the total cycle time (18 mS).

Peak to average ratio: $\frac{6.28}{18} = 0.348$

Peak to average ratio: $20 \log 0.348 = -9.16 \text{ dB}$ or -9 dB
