3. Getting started

Insert the SIM card

To use your phone, you must insert a valid SIM card supplied by your GSM operator or retailer. The SIM card contains your subscription, your mobile number, and memory in which you can store phone numbers and messages.

Insert the SIM card

1. With the back of the phone facing you, push the release button and remove the battery cover and remove the battery.
2. Insert the SIM card: slide the SIM card it into the card slot carefully. Make sure that the clipped corner is in the correct corner and the metal contacts are facing down.
3. Slide the battery into its slots, metallic connectors downwards, until it stops. Then lock it by pushing it downwards.
4. Replace the back cover of your phone: slide it upwards until it locks into its place.

Charge the battery

Your phone is powered by a rechargeable battery. A new battery is partially charged and an alarm will warn you when the battery is low.

1. Once the battery and battery cover are clipped on the phone, plug the connector of the charger (supplied with the phone) into the socket at the the base of the phone, then plug the charger into a main AC power socket.
2. When charging, a charging animation will be displayed on the main display as well as the sub display. When the charge is completed, an alert sound will be heard with the LED indicator changed from red to green.
3. When the battery is fully charged, disconnect the charger.

Note: you can also charge the battery when the phone is switched on.

Switch on the phone

1. Long press [On/Off] key to switch on the phone. The prompt message "Please insert SIM card" means the SIM card has not been inserted correctly. Please check whether the SIM card has been inserted correctly and is valid.
2. You will be required to enter the PIN code (i.e. the 4 to 8-digit secret code of your SIM card) if it is set. PIN code is preconfigured and communicated to you by your operator or retailer. To personalize the PIN code, please refer to **Settings>Phone settings>Security**.

If you enter a wrong PIN code 3 times, your SIM card will be blocked. To unlock it, you must require the PUK code from your operator.

Set date and time

As prompted by the phone at first switch on, set the date by pressing the appropriate numeric keys (press [Hang up key] to erase a number), and then set the time.

Calibration

This feature allows you to calibrate your screen, in order to obtain a better accuracy when using it with the stylus pen. You must tap all three “+” signs one after the other to complete the process.

Copy the SIM phonebook

When the mobile phone detects a SIM card that already contains names, a prompt message will ask you if you want to copy your SIM phonebook onto the built-in phonebook. Press [Hang up key] to cancel or press [OK] to accept. The phone phonebook is set as your default

Icons and symbols for idle mode

Idle mode refers to the status when the mobile phone is switched on and ready for use (when there is not a call in progress and no key presses have been made). The following indicators and icons advise you of the operational status of your phone:

Icons and symbols for main display

-  Battery - The bars indicate the battery level. The more bars are shown, the more power are left.
-  Signal – The bars indicate the signal strength, The more bars are shown, the better the signal strength.
-  Roaming – Displayed when your phone is registered to a network other than your own (especially when you're abroad).
-  Call Forward Unconditional to number – All your incoming voice calls are being forwarded to a number other than voice mail.
-  GPRS attach – Your phone is connected to the GPRS network (to be displayed above the signal icon).
-  Vibra – Your phone will vibrate when receiving a call.
-  Silent – Your phone will not ring when receiving a call.
-  Headset – The headset is inserted to your phone.
-  Alarm – The alarm clock is activated.
-  Missed call – You have a missed call.
-  SMS message – You have received a new SMS message.

-  SMS full – Memory for SMS is full. Delete old messages to receive new ones.
-  MMS message – You have received a new multimedia message.
-  MMS full – Memory of MMS is full. Delete old messages to receive new ones.
-  Memory full – The phone's memory is full. Delete items to store new ones.

Icons and symbols for sub display

-      Battery - The bars indicate the battery level. The more bars are shown, the more power are left.
-      Signal – The bars indicate the signal strength, The more bars are shown, the better the signal strength.
-  Roaming – Displayed when your phone is registered to a network other than your own (especially when you're abroad).
-  Call Forward Unconditional to number – All your incoming voice calls are being forwarded to a number other than voice mail.
-  Vibra – Your phone will vibrate when receiving a call.
-  Silent – Your phone will not ring when receiving a call.
-  Missed call – You have a missed call.
-  Alarm – The alarm clock is activated.
-  SMS message – You have received a new SMS message.
-  MMS message – You have received a new multimedia message.

LED indicators

- Roaming – purple light flash slowly.
- Low battery – red light flashing slowly.
- Charging steady red light (changed into green light when charging is done).

4 Input methods

Keypad input methods

Your phone provides you with the following keypad input methods:

- T9 Pinyin
- T9 Stroke
- T9 English
- ABC
- 123

In text editors, you can press the left soft key to switch from one input method to another.

On-screen keyboard

An on-screen keyboard will appear in any text edition contexts when entering your PIN code, typing a message, entering a name in the phonebook, etc. This allows you to enter text using the stylus pen, like you would do on a PC keyboard. Using the stylus is equivalent to pressing the actual keys of the phone.

Handwriting recognition

You can enter Chinese characters, English letters, numbers, symbols and punctuation via handwriting recognition. To enter the handwriting mode, tap the handwriting icon or area on the screen.

5 Stylus operations

The main display of your phone is a touch screen, which is a faster and more intuitive way of navigating through lists and menus. It becomes available as soon as you operate with the stylus located on the side of your phone.

Basic operations

- 1 In menu lists, double tap a menu/icon to enter/activate it, and then apply a reasonable pressure, as if you were writing on paper.
- 2 In the change list field marked by ◀ / ▶, tap the left/right arrow to change your selection.
- 3 When the screen content is longer than one page, tap the scroll bar at the right side of the screen to turn pages.

Enter text

In handwriting recognition mode, you can enter Chinese, English, numbers and symbols (including punctuations) by means of handwriting recognition.

The on-screen keyboard allows you to enter text using the stylus pen, just like you would do on a PC keyboard. Using the stylus pen is equivalent to pressing the actual keys of the phone.

Perform functions

- 1 Tap the on-screen functions icons to perform the corresponding functions.
- 2 In most contexts, an arrow ↶, in the upper right corner of the screen or a red cross mark together with a prompt message allows you to cancel the last action or go back one level. The OK  or a green check mark will let you validate your choice or action. Using these touchscreen items are similar to pressing the [Hang up key] or [OK] key on the keypad.
- 3 In idle screen, tap any point on the screen (except the top bar and bottom bar) to enter an on-screen keyboard for entering a phone number.

6 Call functions

Make or answer calls

Make calls

In idle screen, enter the phone number using the number key.

Press [Pick up key] or the left soft key to dial the number.

Press [Hang up key] to end or cancel the call.

Note:

- In idle screen, long press [Pick up key] to display IP call pre-dial screen.
- When enter the phone number, you can press the right soft key [Clear] to delete any chracters or digits before the cursor.
- When enter the phone number, you can press [OK]-[1] to save the number.
- When enter the phone number, you can press [OK]-[2] to access the names list.
- When enter the phone number, you can press [OK]-[3] to switch on/off the handsfree function.

Make intanational calls

To make an international call, you can enter the international prefix “+” and the country code and the area code before the phone number.

- 1 Long press [*] until “+” appears.
- 2 Enter the country code and area code directly.
Or, you can press the left soft key [Area] to display the world city list, and then select a desired entry and press [OK] to insert the corresponding country code and area code automatically.
- 3 Enter the phone number, or press [OK] and select **Contacts** from the menu to find a desired phone number from the phonebook.
- 4 Press [Pick up key] to dial the number.

Redial

If a call attempt fails, you can press the left soft key [Redial] to redial the phone number, ore press the right soft key [back] to go back to the idle screen.

Dial from names list

- 1 In idle screen, press ▼ to view Names list, or press[OK] to access the main menu and then press [2]-[1] to view the names list.
- 2 Press [▲/▼] to select a desired name and then a desired number.

- 3 Press the [Pick up key] to dial the number.

Dial a number set in schedule alarm

If you have set a phone number as an alarm in Schedule, the phone number will be displayed on the screen when the alarm rings. You can press [Pick up key] to dial the number, or press any key (except [Pick up key]) to turn the alarm off.

Dialing a phone number as an alarm

If you have set a phone number as an alarm in **Schedule**, you can see the title and phone number on the screen when the alarm sounds. You can:

- 1 Press [OK] to dial the number.
- 2 Press any key (except [OK]) to turn the alarm off.

Dial from call list

- 1 In idle screen, press [Pick up key] to display the last dialed numbers.
Press [▲/▼] to select a desired number.
Press [Pick up key] to dial the selected number.
- 2 In idle screen, press [OK] to enter the main menu.
Press [1]-[1] to enter the call list.
Press [1] to access the list of Missed calls, or press [2] to access the list of Incoming calls, or press [3] to access the list of Outgoing calls.
Press [▲/▼] to select the desired phone number.
Press [Pick up key] to dial the selected number.

Make an emergency call (with or without a SIM card inserted)

In idle screen, enter the emergency call number directly and press [Pick up key] or the left soft key to dial.

Flash dial

Number keys (2~9) can be used to flash dial a phone number.

Once you have assigned a phone number to one of the number keys, you can press and hold the key in idle mode to flash dial the corresponding phone number.

Answer incoming calls

When the flip is open, the information about the call will be displayed on the main display, you can:

Press [Pick up key] or the left soft key to answer the call.

Press [Hang up key] or the right soft key to reject the call.

Note:

- If **Call forward (If busy)** is set to be **On**, incoming calls will be forward to designated number for **Call forward**.
- If the caller hangs up the call before you answer it, a missed call icon will be displayed on the subdisplay, while a missed call icon and prompt will be displayed on the main display.

Any key answer

If you have activate **Any key answer** in Settings>Phone settings>Answering, then you can press any key (except the right soft key and the hang up key) to answer an incoming call.

Active flip

If you have activated **Active flip** in Settings>Phone settings>Answering, then you can open the flip (if the flip is closed when the call comes) to answer an incoming call.

Headset auto answer

If you have activated **Auto answer** in Settings>Phone settings>Answering and inserted the headset to your phone, then you can answer an incoming call automatically..

Adjust the earpiece volume

During a call, if you want to adjust the earpiece volume, press Vol_Up/Vol_Down keys at the right side of the phone to increase/decrease the earpiece volume.

Functions during a call

During a call, your phone provides with many functions including accessing the names list, using handsfree function, call waiting, multiparty call and sending SMS. Some of the functions are subscription dependent and specific to operators.

Call waiting

Call waiting is a subscription dependent feature alerts you when someone is calling you while you are on another call. You need to activate call waiting in **Call services/Call settings/Call waiting** .

Press the left soft key or [Pick up key] to answer the second incoming call, while the first one is put on hold. After answering the second incoming call, you can press the left soft key to toggle between the calls (one is put on hold and the other is then activated), or you can press the right soft key to toggle between mute/normal mode for the current active call.

Press the right soft key to reject the second incoming call, while the caller hearing a busy tone. Meanwhile the first incoming call is still active.

Conference call

You can activate a conference call by making several outgoing calls. You may have up to five members at the same time.

Make a first call with someone, then a second one. Press [OK] and select **Multiparty->Join all** and press [OK] to confirm. Repeat the process until other members are connected.

During a conference call, you can press [OK] and select **Multiparty->Private** to have a private call with the selected member only (other members are put on hold). To end the private call, press the [Hang up key].

To end all calls, you can press [OK] and select **Multiparty->End all calls** and press [OK] to confirm.

Handsfree

This menu allows you to activate or deactivate the handsfree function.

To activate, press [OK] during a call and select **Handsfree**, and then press [OK].

To deactivate, press [OK] during a call (while handsfree is set to be on) and select **No handsfree**, and then press [OK].

Note:

- **This function will not be available when the headset is inserted.**

Send DTMF

To control an answering machine or use telephone banking, you need to use codes. These codes are sent as tone signals (also known as DTMF - Dual Tone Multiple Frequency tones). DTMF is set to be on by default.

To deactivate the function, press [OK] during a call and select DTMF off, and then press [OK].

To activate the function again, press [OK] during a call and select **DTMF on**, and then press [OK].

Send SMS

During a call, you can write a SMS message and send it out.

- 1 During a call, press [OK] and select **New SMS**, and press [OK].
- 2 Edit the SMS message and send it out.

Access the main menu

During a call, you can access the main menu.

- 1 During a call, press [OK] and select **Main menu**, and then press [OK] to enter the main

menu.

- 2 Please be noted that you can not access **Call settings**, **WAP**, **Multimedia**, **MMS**, **Camera**, **PC communication** and **Settings** during a call.

7. Call services

Call list

The last 30 missed calls/incoming calls/outgoing call are stored in corresponding folders in Call list.

In the call list menu list, you can press [1] to access Missed calls, press [2] to access Incomingcalls or press [3] to access Outgoing calls. Meanwhile, you can move cursor to select item, and then press the left soft key [Select] to view the corresponding information.

In the list screen of Missed call/Incoming call/Outgoing call, you can press the [Pick up key] to dial a selected number directly.

View

In the list screen of Missed call/Incoming call/Outgoing call, you can press the left soft key [View] to view the details of the selected record.

Save

In the list screen of Missed call/Incoming call/Outgoing call, you can press the right soft key [Save] to save the selected number into Contacts.

Delete

In the list screen of Missed call/Incoming call/Outgoing call, you can press [OK] and select **Delete** to delete a selected record and then press [OK] to confirm. To delete all the records in a selected folder, you can press [OK] in the list screen and select **Delete all**, and then press [OK] to confirm.

Call settings

Call forward

Call forward is a subbscription dependent feature, it enables you to divert incoming calls to a designaged phone number with the following options:

- All calls: to divert all the incoming calls
- If busy: to divert an incoming call only when your phone is busy
- If now answered: to divert an incoming call only when it is now answered
- If not reacheable: to divert an incoming call when your phone is power off or out of the network service area.

Call barring

Call barring is a subscription dependent feature, it enables you to restrict incoming calls to and

outgoing calls from your phone with the following options:

- Incoming (All) - All incoming calls are forbidden.
- Incoming (When roaming) - All incoming roaming calls are forbidden.
- Outgoing (All) – All outgoing calls are forbidden.
- Outgoing (International) - All outgoing international calls are forbidden.
- Outgoing (Intl. exc. Home) – Only outgoing calls to numbers of subscription country are allowed.

Fixed dial

Fixed dial is a subscription dependent feature, it enables you to restrict outgoing calls to designated phone numbers. PIN2 code is required to activate this function.

Caller ID

This feature enables you to show or hide your identity to your correspondent. The status option will inform you if this function is activated or not.

Voice mail number

This menu enables you to enter the voice mail number.

Call waiting

Call waiting is a subscription dependent feature alerts you when someone is calling you while you are on another call. The status option will inform you if this function is activated or not.

Call counters

GSM counter

This menu gives you access to the following information: duration of last call, duration of incoming calls, durations of outgoing calls and total call duration. You can press the left soft key [Reset] to set all the duration to zero.

GPRS counter

This menu gives you access to the following information concerning transfer volume of your phone during WAP connections over GPRS.

All connections: transfer volume of all connections (including Sent, Received and Total)

Last connection: transfer volume of the last connection (including Sent, Received and Total)

Clear logs: You can select **Yes** to clear the history records, or select **No** to keep the history records.

8 Contacts

There are two available phonebooks: the one on your SIM card (number of entries depending on SIM card capacity) and the one in your phone (up to 500 entries), which is the default selected phonebook.

Add an entry in a phonebook

- 1 In the list screen of the names list, select **<New>** and press [OK]; or in the browse screen of the Names list, press [OK] and select **Add**, and then press [OK].
- 2 In the **Category** field, press [◀ / ▶] to select a category. Categories available are: General, Family, Friends, Business, VIP and SIM. To save an entry on your SIM card, you have to put it in the SIM category (the SIM category will be available only when the SIM card is inserted).
- 3 Enter the following information to the entry: last name, first Name, company name, mobile phone number, home phone number, office phone number, IM (Instant Messaging) number, Fax number and Email address.
- 4 In the **Photo** field, you can link a picture to the entry. Press [◀ / ▶] to select a picture, or press the left soft key to enter the picture list to choose one.
- 5 In the **Melody** field, you can link a melody to the entry. Press [◀ / ▶] to select a picture, or press the left soft key to enter the melody list to choose one.
- 6 In the **Security** field, you can activate/deactivate number protection function. Once activated, the entry will be displayed as ***** in the phonebook and you will be asked to enter the phone to view its details. When there is an incoming call from a protected number, the number will also be displayed as ***** and the corresponding picture will not be shown.
- 7 In the Notes field, enter any further information you want to add.
- 8 After entering all the information, press [OK] to confirm and save the entry.

Edit an entry in a phonebook

To edit an entry in a phonebook, press [OK] in the list screen (or in the browse screen of a selected entry) and press Edit, and then press [OK] to enter the edit screen of the selected entry.

Groups settings

You can create call groups, edit them and rename them.

To create a user-defined call group, press [4] in the Settings menu of Contacts and select

Group to enter the list screen, press the left soft key [Add] enter the name editor, enter the desired name and press [OK] to confirm. At most 8 user-defined groups can be added.

To rename a user-defined call group, move the cursor to select a group and press the right soft key [Rename] to enter the name editor, change the group name and press [OK] to confirm.

To delete a user-defined call group, move the cursor the select a group, and then press [OK] and select **Delete**.

Use the phonebook

Dial from phonebook

In the names list screen of the phonebook, press [Pick up key] to dial a number in the selected entry. If there are more than one number stored in the entry, you will be required to select a desired one before dialing out.

View an entry

In the names list screen of the phonebook, press the left soft key [View] to view the details of the selected entry. In the browse screen of the selected entry, you can press the left soft key to view the details of the previous entry or press the right soft key to view the details of the next entry.

Search for an entry

Your phone provides you with the following searching methods:

- Search by initial letter

In the names list screen of the phonebook, enter the initial letter of the entry you want to search for (small letters to be matched for English entries, capital letters to be matched for Chinese entries), and then the cursor will be located at the first one of the matched entries.

- Search by keyword

In the names list screen of the phonebook, press [OK] and select **Search** to enter a text editor, enter the keyword and then press [OK] to search for the entries containing the keyword. The matching entries will be displayed as a list.

Copy phonebook

Copy a single entry

In the names list of a phonebook, move the cursor to select an entry, press [OK] and select **Copy**. You will be required to choose between **Copy to phone** and **Copy to SIM**, make your choice and press [OK] to confirm.

Copy all entries

To copy all the entries in a phonebook, you can select **Copy all** in the Settings menu of Contacts. You will be required to choose between **Copy to phone** and **Copy to SIM**, make your choice and press [OK] to confirm.

Delete entries

Delete a single entry

In the names list of the phonebook, move the cursor to select an entry, press [OK] and select Delete, or you can press [OK] and select Delete in the browse screen of a selected entry. At the prompt message "Delete?", press [OK] to confirm or press [Hang up key] (or the right soft key) to cancel.

Delete all

In the Setting menu of Contacts, you can select **Delete all** in the Settings menu of Contacts. At the prompt message "Delete all?", press [OK] to confirm or press [Hang up key] (or the right soft key) to cancel. Please be noted that **Delete all** is not available for SIM phonebook.

Send phonebook entries

You can send out phonebook entries via SMS (using Smart Message format). In the names list of a phonebook, move the cursor to select an entry, press [OK] and select **Send via SMS**, or you can press [OK] and select **Send via SMS** in the browse screen of a selected entry. And then you will be required to enter the receiver's phone number, enter the number and press [OK] to confirm.

Contacts select

This menu allows you to choose one of the following display options for phonebook:

Phone: display the phone phonebook only.

SIM phonebook: display the SIM phonebook only.

Phone + SIM: display both the phone phonebook and the SIM phonebook.

Status

This menu allows you to access the status information of the phonebooks in status bar as well as in text.

SIM phonebook status: stored entries/total entries.

Phone phonebook status: stored entries/total entries.

9 WAP

Your mobile phone supports services based on the Wireless Application Protocol (WAP). The built-in WAP browser allows you to access services supplied with your network, such as news, sports, weather, etc.

Your mobile phone readily supports the WAP function if it is included in your subscription; if your phone was pre-configured, it shouldn't be necessary for you to change the settings described in this section. With some operators, WAP parameters can be set remotely. Please check directly with your operator for detailed information.

This main menu of the WAP browser allows you to configure the settings related to WAP, connect to your operator's homepage, define bookmarks for direct and faster connections, etc.

Launch a WAP session

- 1 To launch a WAP session, on the main menu screen, select WAP>Homepage
2. Your mobile phone will connect to the network and according to the Access settings you have defined in the **Settings**.
- 3 The browser is launched and your phone connects to your operator's homepage.
- 4 Move the cursor to navigate the on-line pages, and press the left soft key [Select] to select a highlighted item.
5. Press [OK] and select **Exit** to return to the previous page.

Homepage

The Homepage is the link to the first WAP site you will access when launching WAP from the idle screen. In most cases, this menu item of the WAP services menu is preconfigured and will connect directly to your operator's WAP homepage.

To change this default homepage see **Settings** in this section.

Bookmarks

This menu allows you to store your favourite WAP site addresses, rename them if desired and access them quickly from the list. the Options, then select Bookmarks.

Adding bookmarks

- 1 Select WAP > Bookmark > Add bookmark and then press the left soft key [Add].
- 2 Enter the new name and the address..
3. Press [OK] and select Save to save the record..

Managing bookmarks

On the bookmark list screen, press [OK] to access the following options.

--Add : to add new bookmarks.

--View: to view and or edit the select bookmark.

--Delete: to delete the select bookmark.

--Delete All: to delete all the bookmarks

Using bookmarks

To connect to a WAP site you have stored as a bookmark, simply select it in the list and press the left soft key to launch the connection.

Go to URL

This menu allows you to enter a WAP site address, to which you can connect directly when selecting it and pressing [OK]. This is a quick way to access WAP addresses without saving them as bookmarks.

- 1 Enter the URL address of the desired homepage.
- 2 Press the left soft key to connect to this page.

History

The information or services you have accessed are recorded in the history..

To connect to a WAP site stored in the history, simply select it in the list and press the left soft key to launch the connection.

To clear the records, on the history list screen, press [OK] and select Delete All Press [OK] for the confirmation.

Settings

WAP connection

Allows you to select the type of network used by the selected profile when launching a connection.

GPRS or CSD: your mobile will only use the GPRS or the CSD network for WAP connections.

Access profiles

Once your SIM card is inserted, the phone will automatically take and use the default WAP service settings on the card. You can also enter the settings manually if you wish to add more profiles.

The phone provides you with five options of connection profiles; you can choose and activate your desired profile.

- 1 Move the cursor to select a setting group.
 - You can only select and use one setting group on each occasion.
- 2 Press the right soft key to enter WAP connection setting screen. The following options are available:
 - **CSD Settings** – settings for CSD connection
 - **WAP Settings**
 - Homepage:** the homepage address of the WAP service that you would like to use

IP Address: the gateway IP address

Delay Time: time delay for auto shut-down of WAP connection

- **CSD connect**

Dial Number: the phone number for WAP connection

User Name: the user name for WAP login

Password: the password for WAP login

Link Type: ISDN/PSTN

- **GPRS Settings** (where service is available) – settings for GPRS connection.

- **WAP Settings**

Homepage: the homepage address of the WAP service that you would like to use

IP Address: the gateway IP address

- **GPRS connect**

APN: the Access Point Name address

User Name: the user name for GPRS connection

Password: the password for GPRS connection

Push inbox

This menu allows you to read and manage messages automatically sent to you by the network and / or by your operator.

- 1 If you have been informed that you received a push message, press the left soft key to read it.
- 2 Otherwise, select WAP > Push inbox, press the left soft key to view the push message.

.

Subject: Enters MMS heading.

Cc: Enters the phone number/e-mail address of recipient(s). A copy of the message is sent to the recipient(s).
 - 6 After entering the required data, press [OK] and select **Send..**

The screen prompts: *"Sending"*. It takes more time to send an MMS message than to send a text message.

Note:

MMS messages support the following formats:

Picture: jpeg/gif/wbmp

Sound: mmf/l-melody/midi

Receiving and reading MMS messages

When you have a new MMS message, the MMS message icon will be displayed on the external display and the message "X new MMS(s)" will be displayed on the internal display.

If **Auto download** setting is set to **On**.

- 1 In idle screen, press the left soft key to display the MMS list.
- 2 Move the cursor to select a desired MMS, and press the left soft key to view the details. To scroll through pages, press **【▲/▼】**.

If the **Auto download** setting is set to **Off**:

- 1 In idle screen, press the left soft key to display the MMS list. Move the cursor to select a desired MMS. To read the MMS later: In idle mode, press [OK], select Messages>MMS>>Inbox>MMS unread to view the MMS.
- 2 Press the left soft key to download the selected MMS.
- 3 The screen prompts: **Downloading**.
- 4 Once the MMS is downloaded, press the left soft key to view the details. To scroll through pages, press **【▲/▼】**.

Replying to an MMS message

- 1 On the MMS list screen or when viewing the MMS message, press [OK], select **Reply by MMS** or **Reply by SMS**.
- 2 Press [OK] and edit your new MMS or SMS message.

Forwarding an MMS message

- 1 On the MMS message list screen or when viewing the MMS message, press [OK], select **Forward**.
- 2 Press [OK] to display the items inserted in the MMS.
- 3 Press [OK] and select Send.
- 4 Move the cursor to scroll through the input fields. Enter the required data.
- 5 Press [OK] and Send, and then press [OK].

Saving a phone number from an MMS message

- 1 On the MMS message list screen, scroll to the phone number you would like to save, press [OK], and then select **Save number**.
- 2 Press [OK]. Move the cursor to select **As New Record** (create a new entry) or **Into Old Record** (Replace the old record).

To add a new entry, see **Adding an entry in the Directory**.

Saving a picture from an MMS message

- 1 When viewing the MMS message, press [OK], select **Save image**.
- 2 Press [OK] to save the image in the Multimedia>Picture>Own picture.

Saving a ring tone from an MMS message

- 1 When viewing the MMS message, press [OK], select **Save Sound** and then press [OK].
- 2 Press [OK] to save the ring tone in the Multimedia > Sound album > Own album.

Erasing an MMS message

- 1 On the MMS list screen, scroll to the MMS you would like to delete, and press the right soft key [Delete].
Or when view the MMS message, press [OK] and select Delete.
- 2 The screen prompts: *"Delete?"*.
- 3 Press [OK] to confirm the deletion.

To erase all the MMS messages in an MMS folder

- 1 On the MMS list screen, press [OK], and select **Delete all**.
- 2 The screen prompts: *Delete*.
- 3 Press [OK] to confirm the deletion.

MMS folders

All the MMS messages are stored in the corresponding folder according to their status in the phone memory. Your phone can store up to 100 MMS messages.

- New messages are stored in the sub-folder of MMS Unread in the Inbox.
- Messages that have been read are stored in the sub-folder of MMS Read in the Inbox.
- Messages that have been sent are stored in the sub-folder of MMS Sent in the Outbox.
- Messages that you wish to send later are stored in the sub-folder of MMS Unsent in the Outbox.

Note:

The phone memory capacity is limited. You may have to delete old messages before you can receive new ones when the memory is full.

Broadcast messages

Your service provider may offer information services such as weather, traffic conditions, etc. Your phone can only receive a cell broadcast message when it is in idle mode. For available information topics and related channel numbers, contact your service provider.

If you've activated **Auto Display** (See CB settings), the received CB messages will be automatically displayed on the idel screen, Otherwise, you can enter Messages>Broadcast SMS to view the received CB message.

Message Settings

SMS Setting

Scroll to the item that you would like to set.

- SMS centre NO. to enter the number of the service centre advised by your network operator.
- Validity: to select the length of time the service centre should keep and attempt to deliver your text messages.
- Type to select the type of your outgoing messages.
- Or, press [Select], scroll to the desired type and press [OK].
- Location: Press the navigation key to select the storage location of SMS(s).
- Notification: to select On or Off. Select On to request a delivery report on your message.
- Location: to select the storage location of SMS(s).

Press [OK] to confirm the settings.

MMS Setting

WAP Setting

- Homepage: the homepage address of the WAP service that you would like to use
- IP Address: the gateway IP address

- APN: the Access Point Name address
- User Name: the user name for GPRS connection
- Password: the password for GPRS connection

Other Setting: Scroll to the item that you would like to set.

- Validity: to select the period in which the multimedia message centre is to try to deliver your MMS message.
- Delivery Report: to select **On** or **Off**. Select **On** to request a delivery report of the received MMS message.
- Auto download: to select receiving the complete MMS message or only notification of arrival.
 - On:** Your phone automatically downloads messages to your phone as soon as they come to your operator's server. (This function is not available when you have a call in progress, an active WAP connection, an MMS message in sending/receiving process, or application running.)
 - Off:** Only the notification of arrival is received. You need to download the message manually. (This is the default setting.)
- Priority: to select the send priority: Normal, High, Low.
- Anonymous send : to select whether hide your phone number.
- Receive AD MMS. to select whether receiving ad MMS.

Groups

You can create up to 9 groups of recipients. Each group consists of up to 10 numbers (email addresses).

You can then send a SMS/MMS message to all members of a selected group at the same time.

To set up a group

- 1 On the Message groups screen, select SMS groups or MMS groups.
- 2 Press the left soft key [Add].
(If there are already some groups, press the right soft key [Add].)
- 3 Enter a title for the group in the **Title** field.
- 4 Move the cursor to the **Member** field, enter a phone number (or recall the phone number from the **Contact** by pressing the left soft key [Find]). You can enter up to 10 phone numbers (For MMS groups, you can enter both phone numbers and email addresses)
- 5 To save the setting, press [OK].

To modify a group

- 1 On the SMS/MMS group list screen, select the group you would like to modify.
- 2 Press [OK] and select **Modify**, and then press [OK].
- 3 You can modify the title or the members.

To delete a group

- 1 On the SMS/MMS group list screen, select the group you would like to delete.
- 2 Press [OK] and select **Delete**.

- 3 The display will prompt *"Delete"*.
- 4 Press [OK].

To delete all groups

- 1 On the SMS/MMS group list screen, press [OK] and select **Delete all**.
- 2 The display will prompt: *"Delete all?"*.
- 3 Press [OK].

Broadcast SMS settings

To access the Broadcast SMS settings: In idle mode, press [Menu], select **Messages > Settings > Broadcast SMS**.

- 1 Press the navigation key to select the desired option.
- 2 Press [Select] to check the highlighted option, which means to activate it.
 - **Deactivate CB**: Turn CB service off.
 - **Channel Index**: This option allows you to select up to five different channels for receiving cell broadcast messages.
 - **Auto Display**: The received cell broadcast messages will be automatically displayed on the idle screen.

To set a CB channel

Scroll to the **Channel Index** and press [OK].

Press the left soft key [Add].

13 Camera

Your mobile phone features a digital camera that allows you to take pictures, store them in your phone, use them as wallpaper or send them to your friends. Meanwhile, you can also record short video clips without sound using the built-in camera.

Still camera

How to ...

Delete the picture

Press [Hang up key] right after the shot.

Access the shot options

Press [OK] right after the shot.

Activate/deactivate the self-timer

Press [0].

Settings

Preview mode settings

Once the camera is activated, the lens of the camera is automatically focused and functions icons are displayed in the bottom (Zoom, Effect, Camera mode, Vision Mode) and top (Option menu and Back icon).

- **Camera mode**

There are altogether 5 options: SXGA(1280*960) · VGA(640*480) · QVGA(320*240) · Wallpaper (128*160) and Fotocall(96*64). In SXGA/VGA/QVGA mode, please turn the mobile phone to a 90° angle to the left and hold it horizontally to obtain a fullscreen preview, with the navigation keys to be automatically adapted to horizontal position; in Wallpaper / Fotocall mode, please hold the mobile phone horizontally in its normal position.

- **Zoom mode**

This option is available in all modes: two-level (*2 and *3) zoom for Wallpaper mode, two-level (*2 and *4) zoom for QVGA and Fotocall modes, one-level (*2) zoom for VGA and SXGA modes. In Wallpaper and Fotocall modes, press ▲ or ▼ to zoom in or out; in QVGA, VGA and SXGA modes, hold the phone horizontally and press ▲ or ▼ (which are actually ◀ and ▶ of the navigation key when you hold the phone vertically) to zoom in or out.

- **Special effects**

Allows you to choose one of the available effects. In Wallpaper and Fotocall modes, press ◀ and ▶ to zoom in or out; in QVGA, VGA and SXGA modes, hold the phone horizontally and press ◀ and ▶ (which are actually ▲ or ▼ of the navigation key when you hold the phone vertically) to zoom in or out.

- **Vision mode**

Two vision modes are available: Normal and Night mode (reflected by the moon icon at the bottom right of the preview screen). You can press [*] to toggle between these two modes.

Self-timer

Allows you to set the Self-timer option On or Off. You can press [0] to toggle between the two modes.

In preview screen, you can also press [OK] to access further settings other than the ones available directly within the preview screen.

General settings

- Camera mode

Allows you to choose a camera mode among the five available modes, the default being Wallpaper. In the camera mode list screen, press [▲/▼] to move the cursor and press the left soft key to select a desired mode.

- Brightness

Allow you to choose the brightness level from the 7 available levels, the default being Level 4. In the brightness level list screen, press [▲/▼] to move the cursor and press the left soft key to select a desired level.

- Photo quality

Allow you to choose a quality available among the following: Super fine, Fine, Normal, the default being Super fine. In the photo quality list screen, press [▲/▼] to move the cursor and press the left soft key to select a desired quality.

- Sounds

Allows you to set the Shoot sound for taking a picture and the alert sound for Self-timer, the defaults both being On.

- White balance

Allow you to choose a white balance mode among the following: Auto, Lamp, Daylight, Sunny and Cloudy, the default being Auto.

- Frequency

Allow you to choose a electricity frequency value among the following: Auto, 50Hz, 60Hz, the default being 50Hz.

- Flashlight

Allow you to choose a flashlight mode among the following: Automatic falsh, Always on, Off,

the default being Off.

- **Default settings**

This menu is used to reset all the values to the default ones.

Frame

To choose a frame and apply to the picture you take. This function is only available in Wallpaper mode.

Own pictures

This menu allows you to access Own pictures folder to view the pictures taken by the built-in camera.

Comic photo

Set this option to On to take a 4-in-one picture.

Burst capture

Set this option to On to take burst pictures. This option is only available for VGA/QVGA/ Wallpaper modes. In VGA mode, you can take at most 10 continuous pictures; in QVGA and Wallpaper modes, you can take at most 15 continuous pictures. You can set the number of pictures from 4 to the top limit.

Effects

To choose an effect and apply to the picture you take: Normal, B&W, Blue, Green, Brown, Red, Negative and Oil.

Vision mode

To choose one of the two modes available: Normal and Night. The default mode is Normal.

Self-timer

Set this option to On to activate it and press [OK] to go back to the preview mode to take a picture in self-timer mode.

Take a picture

- 1 If the self-timer option is set to be Off, and once the camera is activated, press the camera key or the left soft key (when the flip is open) to take a picture.
- 2 If the self-timer option is set to be On, the self-timer icon will be shown on the screen, press the camera key or the left soft key (when the flip is open) to take a picture in the

self-timer mode. The countdown starts at 5 seconds (this value cannot be changed). An alert sound is played 2 seconds before the picture is taken, then the shoot sound is played when it is actually taken.

After the picture is taken and displayed on the screen, you can:

- press the camera key (or tap the corresponding icon using the stylus) to save the picture and go back to the preview screen.
- press the [Hang up key] (or tap the corresponding icon using the stylus) to delete the picture and go back to the preview screen.
- Press [OK] (or tap the option menu icon on the screen) to access the following list of available options: Rotate (Left 90° , Right 90° , 180° , Horizontal mirror or Vertical flip), Save picture, Send via MMS, Take a new picture or Back to idle.

The number of pictures you can save varies according to the settings: the higher the resolution, the bigger the file size.

View the pictures

The pictures you save are automatically stored in the **Multimedia>Picture album >Own pictures** menu, and are automatically named after the date and time when they are taken.

Receive a call

When receiving a call while using the camera, answering or rejecting it will quit the camera context and bring you back to the camera function list screen. If the picture has not been saved, it will be lost.

Make a call

To make a call, you must first go back to the idle screen.

Video camera

This menu allows you to record at most 10 video clips, the time limit for a single video clip is about 45 seconds.

Record new video clips

When there are no records in Video Camera, you can press the left soft key is [Add] to add a new record, or press the right soft key [Back] to go back to the previous menu.

As soon as an entry is added, the left soft key is remained as [Add] while the right soft key is changed into [Play], you can press the left soft key to add a new record, or press the right soft key to play a selected video clip.

In the preview mode, you can :

- press the [▲/▼] to zoom in/out, or press [◀/▶] to switch from one available effect to another.
- press the left soft key (or camera key) or tap the green dot on the upper left corner of the screen to begin recording, and then the green dot will be changed into a red dot with "Recording..." to be displayed at the right side of it.
- Press [Hang up key] (or camera key) or tap the red dot on the upper left corner of the screen to terminate recording. The recorded video clip will be automatically saved and named after the recording date and time. If not stopped by user, the recording will automatically terminated when the time limit (about 45 seconds) is reached, and the recorded video clip will be automatically saved and named after the recording date and time. The saved video clips will be automatically stored in the **Multimedia>Video**.

Play video clips

In the list screen of video clips, move the cursor to select a video clip and press the right soft key [Play] to play it. During the play process, you can press [Hang up key] to stop it.

Manage video clips

In the list screen of video clips, you can press the left soft key to add a new video clip, or press the right soft key to play the selected video clip, or press [OK] to access the following options:

Add – add a new video clip.

Rename – rename the selected video record.

Delete – delete the selected video record.

Delete all – delete all the video records.

Back to idle – go back to idle screen.

14 Settings

The different functions of your phone can be customized to suit your own preferences via the Setting functions.

To access the Setting functions, you can:

Security

In the Security function, you can activate/deactivate Phone Code, PIN Code and Data protection, as well as edit phone code, PIN and PIN2 code.

—**Phone Code:** a code protects your phone against unauthorized use. If activated, you will be asked to enter your phone code each time you turn on your phone. The phone code is supplied with the phone and the factory default is 1234.

- To set the phone code, you can move cursor to Phone Code, and press [Select] to access the phone code setting screen. After entering the phone code, you can press [OK] to save the setting and exit the phone code setting screen, and the checkbox before Phone Code will be checked.
- To disable the phone code, you can move the cursor to Phone Code, and press [Cancel] to prompt the phone code input screen. After the correct phone code has been entered, you can press [OK] to confirm and go back to the previous screen, and then the checkbox before Phone Code will become unchecked.
- In case you forget the phone code, you can press [Help] to display the following screen. The serial No. displayed is a prompt code randomly generated by the phone, you can ask for the relevant super code from the local service center to unblock the phone code.

—**PIN Code:** a code protects your SIM card against unauthorized use, also known as a Personal Identification Number. If activated, you will be asked to enter your PIN each time you make a call. Your PIN is usually supplied with the SIM card. If you enter an incorrect PIN code three times in succession, the code is disabled and cannot be used until you re-enable it by entering the PUK.

- To set PIN code, you can move the cursor to PIN Code, and press [Select] to access the PIN code setting screen. After entering the PIN code, you can press [OK] to save the setting and exit the PIN code setting screen, and the checkbox before PIN Code will be checked.
- To deactivate the PIN code, you can move the cursor to PIN Code and press [Cancel] to access the PIN code input screen (at most 3 tries), and then you can enter the PIN code you has set before and press [OK] to go back to the previous screen, and then the checkbox before PIN Code will become unchecked.

Note:

- ◆ PIN2: a code supplied with specific SIM cards, which is required to access specific functions, such as setting the maximum cost of a call.
- ◆ PUK: a number key which is required to unblock a blocked PIN, also known as the Personal Unblocking Key. The PUK may be supplied with the SIM card. If not supplied or it is lost, please contact your service provider.)

—**Data Protection:** enables you to protect personal data such as your directory, call records, and so on. If activated, you will be asked to enter the phone code before accessing the protected data.

- To activate Date protection, you can move the cursor to Data protection, and press [Select] to access the data protection type list. To protect a certain type of data, you can move the cursor to the desired type and press [Select], and then press [OK] to save the setting.

Note:

- ◆ To disable data protection, you will also be required to enter the phone code.

—Edit Phone Code

To edit the phone code, you can move the cursor to the Phone Code and press [OK], the screen will prompt “Old code:” for entering the old code, and then prompt “New code:” if the correct old code has been entered, and then prompt “Re-enter:” for entering the new code again. After re-entering the new code again, you can press [OK] to save the new phone code.

—Edit PIN

- When the PIN code has been activated, you can move the cursor to Edit PIN and press [OK] to edit the PIN code. The screen will display the following prompt message: “Enter old PIN, Left times: 3”. If the correct old PIN code has been entered within 3 tries, the screen will display the following prompt message: “Enter new PIN”, and the “Re-enter” for entering the new PIN code again. After re-enter the new PIN code, you can press [OK] to save new PIN code and exit the PIN code editing screen.
- If the correct old PIN code has not been entered with 3 tries, the screen will display following prompt: “Enter PUK, Left times: 10”. If the correct PUK number has been entered within 10 tries, you will be prompt to enter the new PIN code. In case the number of tries exceeds 10 times, the SIM will be blocked and the screen will prompt “SIM not usable.”

—Edit PIN2

- To edit PIN2, you can move the cursor to Edit PIN2, and the screen will display the following prompt message: “Enter old PIN2, Left times: 3”. If the correct old PIN2 code has been entered within 3 tries, the screen will display the following prompt message: “Enter new PIN2”, and the “Re-enter” for entering the new PIN2 code again. After re-enter the new PIN2 code, user can press [OK] to save new PIN2 code and exit the PIN2 code editing screen.
- If the correct old PIN2 code has not been entered with 3 tries, the screen will display following prompt: “Enter PUK2, Left times: 10”. If the correct PUK2 number has been entered within 10 tries, you will be prompt to enter the new PIN2 code. In case the number of tries exceeds 10 times, the PIN2 code is blocked and the functions related to PIN2 code will be inaccessible.

Factory defaults

The function enables you to restore all the original settings of the phone.

Phone code is requested before restoring the factory defaults. The default phone code is 1234.

Note:

- ◆ All the factory default settings are to be restored except for time & date.

Shortcuts

Instead of entering the various menus and browsing the lists, you can set up direct access to a specific function by linking it to a key.

—Right soft key

You can change the definitions for the right soft key:

- press ←/→ to change the setting, or
- press [Select] to display a function list, select a function and press [OK].

—Navigation keys

You can change the definitions for the four directions on the navigation key. Scroll to Up, Down, Left or Right, indicated by an arrow, and then:

- press ←/→ to change the setting, or
- press [Select] to display a function list, select a function and press [OK].

—Hotkeys

You can only program keys 2 to 9 as 0 (select language), 1 (call voice mailbags), # (access WAP) and * (enter international prefix) are predefined and locked, preventing reprogramming. Depending on your service provider, other hotkeys may be predefined and locked.

- 1 Select a key from 2 to 9 and press the left soft key.
- 2 Browse the list to select the function you wish to associate with this key. Press the left soft key, to confirm your choice.

To use the hotkeys, simply press and hold the key corresponding to the function you want to launch or to the number you want to dial while in idle mode.

Network Services

The function enables you to make networking settings. Press [1]-[2] to access **Network Info** and **Preferred network** respectively.

Network Info

—**Network select**: enables you to make network settings in the following ways: select Auto Selection and the phone automatically selects one of the mobile networks available in your area, or you can select a network from the network list by yourself.

—**Frequency**: Press [Select] to select the desired frequency from GSM900/DCS1800 and 1900.

Preferred Network: enables you to set up to 10 preferred networks in the following ways: press [Insert] to display a network list, select a network, and then press [OK] to insert the network in the selected place on the list; or press [Append] to display a network list, select a network, and then press [OK] to add the selected network at the end of the network list.

- You can press [Delete] to delete the selected network from the preferred network list you have set.

Phone Data

On the Phone Data screen, there are three available options as follows:

Phone Info: enables you to view or modify the phone information (own number and IMEI).

Memory status: shows the percentage of memory used/free, and the phone's total memory in KB.

Serial Number: displays the serial number of the phone.

Switch on/off

Switch on time

A checkbox is displayed to enable you to select the function. Press [Select] to select Switch on and then you can enter the switch on time in the format of hh:mm.

Switch off time

A checkbox is displayed to enable you to select the function. Press [Select] to select Switch off

and then you can enter the switch off time in the format of hh:mm.

15 STK

Function items of this menu are subscription dependent and specific to operators. For details, please contact your network operator.

FCC Regulations:

● This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

● This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

► RF Exposure Information (SAR)

This model phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 0.212 W/kg and when worn on the body, as described in this user guide, is 0.393 W/kg (Body-worn measurements differ among phone models, depending upon available enhancements and FCC requirements.)

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: POT-CT7668.

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm from your body when the phone is switched on.
