

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the external components of the EUT. A black computer mouse is positioned vertically next to a black USB receiver and a small black rectangular board. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters. The background is a light blue textured surface.
EUT Housing and Board View 2	 A photograph showing the internal components of the EUT. The white plastic housing is open, revealing the internal circuit board, a battery, and various electronic components. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters. The background is a light blue textured surface.

Solder Board-Component View 3	 A microscopic photograph showing a small, dark, rectangular component soldered onto a blue circuit board. The component is positioned near a black L-shaped ruler with white millimeter markings. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. The component is located at approximately 30 mm on the horizontal scale and 10 mm on the vertical scale.
Solder Board-Component View 4	 A microscopic photograph showing the same component from a different angle, labeled View 4. The component is a small, dark, rectangular chip with a gold-colored pad visible on its right side. It is soldered onto a blue circuit board. A black L-shaped ruler with white millimeter markings is placed next to it for scale. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. The component is located at approximately 30 mm on the horizontal scale and 10 mm on the vertical scale.

Solder Board-Component View 5	
Solder Board-Component View 6	

Solder Board-Component View 7	 A photograph of a small electronic component, likely a solder bridge or a small PCB, placed on a blue textured surface. A black L-shaped ruler is positioned next to the component for scale. The ruler has white markings in millimeters. The component is small and rectangular, with some solder visible on its surface.
Solder Board-Component View 8	 A photograph of the same electronic component from a different angle, showing the underside. The component is placed on the same blue textured surface next to the same black L-shaped ruler for scale. The underside of the component shows various solder joints and components.

Solder Board-Component View 9	 A photograph of a small electronic component, likely a solder bridge or a small PCB, placed on a blue textured surface. A black L-shaped ruler is positioned next to it for scale. The ruler has white markings in millimeters. The component is small and rectangular, with some visible solder or conductive material. The ruler's vertical scale goes up to 100 mm, and the horizontal scale goes up to 80 mm.
Solder Board-Component View 10	 A photograph of the same electronic component from a different angle, showing its top surface. It is placed on the same blue textured surface next to the same black L-shaped ruler for scale. The component appears to have some markings or components on its top surface. The ruler's vertical scale goes up to 100 mm, and the horizontal scale goes up to 90 mm.
