Authorization and Evaluation Division

### Modular Approval Request

FCC ID: PPQ-WCBN4503M

The following attestation addresses the requirements to support modular approval:

| Modular approval requirement                                                                                                                                                                                                  | Yes (provide brief statement)                                                                                                                                                                                                                                                                                                                                                           | No * |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| (a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly                                | Yes, the module in the radio frequency component part use metal sheet shield.                                                                                                                                                                                                                                                                                                           |      |
| (b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal                                                                        | Yes, the modules use the wireless transceiver module as buffer Modulation / data input.                                                                                                                                                                                                                                                                                                 |      |
| (c) The module must contain power supply regulation on the module                                                                                                                                                             | Yes, the module use power as 3.3VDC, can regulation power module model is Marvell 88w8897                                                                                                                                                                                                                                                                                               |      |
| (d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) | Yes, antenna brand name/Model name/Antenna type:<br>BT-<br>Walsin /<br>RFMTA400536IMAB301 、<br>RFMTA34071AIMAB701 、<br>RFMTA34071AIMAB702 、<br>RFMTA34071AIMAB703 / PIFA ANT<br>2.4G & 5G-<br>Walsin /<br>RFMTA401029IMLB703 、<br>RFMTA340770IMLB701 、<br>RFMTA340740IMLB701 、<br>RFMTA340770IMLB701 、<br>RFMTA340745IMLB701 、<br>RFMTA34071AIMLB701 、<br>RFMTA340745IMLB701 / PIFA ANT |      |
| (e) The module must demonstrate compliance in a stand-alone configuration                                                                                                                                                     | Yes, the module is in a stand-alone configuration, as the schematic and internal photos.                                                                                                                                                                                                                                                                                                |      |

|                                                                                                                                                                          |                                                                                               |  |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|--|
| (f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)        | Yes, the module is labeled with its own FCC ID PPQ-WCBN4503M, as the label.                   |  |
| (g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements | Yes, the module is comply the Transmitter rules. And provide Instruction for application.     |  |
| (h) The module must comply with RF exposure requirements                                                                                                                 | Yes, the module is comply the applicable RF exposure requirements in its final configuration. |  |

\* Please provide a detailed explanation if the answer is "No."

Yours sincerely,

*Ta-Chuan Wu*
