

June 29, 2015

To: FCC

From: SIEMIC, INC.

This letter is to clarify why this C2PC only done to DTS FCC grant.

The change of this C2PC filing is stated as in C2PC letter.

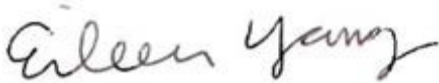

- 1) BT is disabled
- 2) adding new antennas (Phillips P/N: 453564553001r1444, and 453564252521r1444)
- 3) increased power for 802.11g & n20 modes.

The change of 1) & 2) was already covered by another C2PC filing approved on March 09 2015.

This C2PC filing is extension of above mentioned C2PC filing which just to increase RF power for 802.11g/n20 mode.

That is why this C2PC filing will provide testing result of 802.11g/n20 mode with new RF power.

Please let us know if you have any questions. Thanks!

Thank you,
Eileen Yang
