

September 4, 2001

MET Laboratories, Inc.
914 W. Patapsco Avenue
Baltimore, MD 21230-3432
Attn: Marianne Bosley

Dear Marianne:

This letter is to inform you that Repeater Technologies, Inc. of 1150 Morse Avenue, Sunnyvale, California has, as of April 20, 2001, sold it's fiberoptic in-building wireless product line and Southern California Operation that supports this product line, to Remec, Inc., 9404 Chesapeake Drive, San Diego, California 92123.

The two products that presently have FCC certification are:

EK20C190002 Date of Grant: 9/27/2000

EK20C80002 Date of Grant: 8/31/2000

We are requesting these products to be multiply-listed with Remec, Inc. as they are identical in design and construction the products originally certified. The original test data is still representative of the equipment. The product names are to be changed. The OC800 is now the FD800 and the OfficeCell PCS 1900 is the FD1900.

The labels are to be identical to the Repeater Technologies labels in form, content and placement with the exceptions that the company logo will be that of Remec and the Canadian and FCC certification numbers will be those assigned to Remec.

Please send the certification to: Remec, Inc., 300 South Harbor Blvd., Suite 900, Anaheim, CA 92805, Attn: Gary Grimes.

Sincerely,

Gary Grimes
Managing Director
