

Quick Start Guide

FishPod® 10BX

BLUETOOTH BOAT MOUNT FISH FINDER

1 Install the FishPod® Sounder Module

Connect the Depth Sounder Module (DSM) to a 12-volt source that can be switched on and off; the area under the dashboard is typically the most suitable location. Install the transducer as per the instructions applicable for the transducer supplied with the DSM. Scan the QR code in Step 3 for direct access to all installation instructions.

2 Download the App

Scan the QR Code above to download the app from the Apple App Store or the Google Play Store. You can also visit either store and search for the app by entering FishPod into the store's search tool.

3 Watch the Video

Scan the QR Code to access how to videos, installation & operation manuals, parts & accessories, usage ideas, and a complete list of specifications. You can also visit support.norcross-outdoors.com.

FCC WARNING:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
