

FCC ID: PTG66428-TX27

Circuit Description

The 27.145MHz crystal oscillator drives the base of Q2 the final/buffer amplifier. The modulation provided by IC (TX2C/PT8A977B). The output of Q2 has the matching network consisting of T1 and C9 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a 10cm long telescoping chrome over brass tubing . There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 9 Volt ("6F22" size battery x 1) primary battery
