Cautions!

- Do not shake or apply heavy shocks on the product.
It might be the cause of malfunction or damaged.
- Avoid contacting the product with water.
This may cause serious damage to the product. If the player gets wet, wipe with a soft towel or rag as soon as possible.
- When using your headphones/earphones.
Do not wear earphones while driving an automobile, bicycle, or motorcycle.
Not only it is dangerous but also it is illegal in some jurisdictions.
- Listening to the music by earphones at large volume level for extended periods of time may result in damaging your ears.
- You must not newly make any file to CONFIG folder of the player.

To maintain good performance

Avoid high or low temperature and moisture.

Do not have other different things in the product.

Avoid placing the product under high moisture or dust level

Do not drop and impact the product.

Avoid direct sunlight, high temperature from heating device.

Never disassemble, repair or rebuild

Do not place any magnetic device near the product.

Do not use thinner, alcohol, or benzene when cleaning the product

** Earphone should not be inserted into the player when the player is recharged by USB Port from PC.*

Accessories

※Accessories could be changed without notice in advance to increase the performance or quality of the product.

Description of each part of the player

Connecting MP3 player to your PC

1. You can connect the player to your PC by included USB cable. Pick up the included USB extension cable and connect it to the USB port of your PC.
2. Plug USB extension cable in the USB port of MP3 player and Plug the other side of the USB Minijack in the Female USB port of the extension cable.

3. Turn on the player by push and hold the power button. Then, a removable disk will appear in your PC when you open windows explorer.
4. Earphone should not be inserted into the Player when the Player is connected to PC

Caution

For users whose OS version is Windows 98 or Windows 98SE

The Driver for Window 98 and 98SE must be installed in your PC before you connect this player to your PC if you use Windows 98 or 98SE OS. Do not install the driver if your OS is Windows ME/2000/XP.

- Insert the provided program CD to the CD Rom drive in your PC.
- Enter Win98 driver folder and Run the Driver for Win98/SE OS.
- You can visit our website www.stormblue.biz to download the driver for Windows 98/SE

File upload/Download

The player should be turned on in advance before you plug it in the USB port

- a. Open Windows Explorer and select the removable disk newly created.
- b. You can just copy/move files from your PC to the removable disk.
- c. You can create many folders in the removable disk to sort out music files.
- d. Just copy or move any files including music files from your PC to a certain folder in your removable disk.
You must not newly make any files to the CONFIG folder of the removable disk.
- e. You can delete/rename any files stored in the removable disk in the same way as you do in the PC.

Disconnecting the player from your PC

- a. Before unplugging the player from the PC, make sure to double click the Green Arrow icon on the task bar on the right bottom of the PC screen.

- b. When the dialogue box is displayed on the monitor, Click the stop button to stop USB Mass Storage Device.
- c. When a new dialogue box appears, click "OK" to clearly remove the removable disk from your PC.
- d. If you use Windows 98 or 98SE, first open windows explorer. Click the removable disk by right button of the mouse and pop-up menu will appear. Then, you can proceed to disconnect the player accordingly.

Caution

Fatal error may occur in the PC or the player if you remove the player without completing above procedures.

Format the player

- Open Windows Explorer and click the removable disk by the right button of the mouse.
- Click the format menu by the left button of the mouse.

Caution

Format function will delete all files in the player. Backup all the important data before formatting the removable disk.

Charging the player

Just connect the player to the USB port when your PC is turned on. Then the charging lamp will be turned on. You don't need to turn on the player before connecting to the USB port if you only want to charge the player. When fully charged, the charging LED will be turned off.

When the player is turned off. : The player is fully charged within 1.5 ~ 2 hours.

When the player is turned on. : The player is fully charged within 4 to 5 hours.

- To enter the Mode menu, click and hold the mode Mode button. To select the Mode and get out of the Mode menu, click Menu button.
- To play music files, select Audio play mode. To play video files, select movie play mode. In the same way, photo view mode is for image file like JPG and TEXT view mode is for playing TEXT file.

Setup Transcoder program

Click ‘Setup’ button

Video

- Adjust the size and image quality of Transcoding video files. The maximum size is 220 ×176.

Audio

- Adjust the sound quality of Transcoding files.

Path

- Designate the folder in which to save the transcoding files.

※ Bluetooth is optional function and this section is only for A9+ Bluetooth model

Using Bluetooth function

The function of Button in this Setup

- + and - : up and down of the cursor
- Menu button : Enter the submenu / Select (finish) the option in submenu and go back to the previous stage
- ◀◀ button : Go back to the initial stage. After getting back to the initial stage, click and hold Menu button to completely get out of the Setup menu.

[The first stage to connect Bluetooth equipment]

- Move to the Bluetooth setup menu

- Click Menu button to enter submen

- Place the cursor at ON and click Menu button again to initialize the Bluetooth.
To connect the Bluetooth headphones or speakers, they must be turned on and ready to be connected.

- Select 'search device' menu to automatically find and register the bluetooth headphones or speaker.

- If there are any bluetooth equipments already registered, use 'connect device menu' to connect them quickly.

- Password must be input to register any bluetooth product. There is the password of the connecting device in its manual. Use + or - button, ►► or ◀◀ button to choose numbers and click Menu button to input the number. After finishing to input password, move the cursor to 'OK' button and click Menu button to complete this process.

- When connected or failed to connected, it display the message.

[Bluetooth instructions]

1. There could be radio(electric wave) interference between bluetooth equipment and other device such as industrial equipments, medical equipments and microwave ovens which use similar range of frequency. It can not be avoided technically.
2. Stand at least 5m away from wireless LAN area to use bluetooth without radio interference
3. The available range of bluetooth is basically 10m and it will be disconnected if it gets away more distantly. The range can be changed depending on the circumstance of the place. Some high obstacles like partitions, corner of the wall affects the radio acceptance causing noise to the wireless sound transmission.
4. Touch on the antenna part of bluetooth can cause some noise and malfunction.
5. When registering bluetooth equipment to the player, do not place them far.

Firmware upgrade

- 1) Please, keep up with new firmware released on our website at www.stormblue.biz
- 2) Download a updated firmware file from the STORMBLUE website and unzip the file if the file format is zip file.
- 3) Turn on the player and connect it to the USB port of your computer and then a removable disk will appear. Copy the firmware file to Config folder of the player
- 4) Safely remove the removable disk and pull the player off the USB port. (When disconnected, the player will be automatically turned off).
- 5) Power on the player and click and hold the 'Menu' button to enter menu mode.
- 6) Enter control menu and enter F/W upgrade menu by clicking Menu button. Click 'yes' by Menu button and then it upgrade F/W by itself.

Caution!

- * Check the current firmware version of your player. Firmware upgrade will be implemented only for higher version of firmware.
- * When you make a firmware upgrade, make sure the battery has been charged enough. (The remaining battery must be over one-third of battery full)

Specifications about MP3 part

Profile	A2DP (source), AVRCP (target)

When you connects the player and a Bluetooth headphone, please refer to manuals of the player and the headphone. But, if you encounter problems while your using the player, this section will help guide you on how to solve them.

1. Before you use the player Bluetooth, you must set Bluetooth mode to "On" in Bluetooth Menu.
- Also a Bluetooth headphone to use must be turned on.
2. The player can't search a Bluetooth stereo headphone to use
- Ensure that the headphone is stereo type. the player support only stereo type, not mono type.
- Check if the has been set to discoverable mode or pairable mode. the player searches headphones only in these modes.
3. The player fails to register a Bluetooth stereo headphone
- Check if the headphone has been set to pairable mode. the player registers headphones only in this mode.
- Ensure that PIN code is right. PIN code must be the same as the headphone's.
4. The player can't connect to a Bluetooth stereo headphone
- Ensure that the player registered the headphone. Before connection, the player must register the headphone.
- If the player and the headphone are paired already, re-register the headphone. Registered information can be deleted in two devices.
- Check the battery status. If the battery is too low, the player can't connect to the headphone normally.

5. No sound in a Bluetooth stereo headphone

- Ensure that the player and the headphone are connected.
- Ensure that the player plays music.
- Check the volume of the headphone
- Check the battery status. If the battery is too low, the player can't transfer music to the headphone normally.

6. Volume control doesn't work when using Bluetooth headphone

- You must use the volume button on the Bluetooth headset to adjust the volume of the player
- The volume key of the player is available only when using normal earphones

7. You don't know what's wrong

- If you operate the player and a headphone as manuals but you can't listen to no sound at the headphone and you don't know what's wrong, try to do next :
Turn off the headphone and on again. Also, set Bluetooth of the player to Off mode and to On mode again. And repeat as manuals.
- If you repeat but you can't listen to no sound, please contact to us, StormBlue.

1. The Player does not power on

- Lock is in the HOLD position? (Release the hold)
- The batteries are exhausted? (Recharge the batteries)
- Click the Reset Button and initialize the player

2. No sound is heard from player or distortion is heard during playback

- Check whether VOLUME is set to "0".
- Make sure that there are MP3 files in the memory
- Check whether plug is dirty.
- Corrupted MP3 or WMA files may make a static noise and the sound may cut off. Try with other files.

3. Characters on LCD are abnormal

- Check the language is setting at "English" in MENU

4. FM Radio does not work

- Adjust the position of the player and earphones.
(The earphones works as antenna, they must plugged in for best reception)
- Turn off the power of other electric devices near the player.

5. Failed download

- Make sure the USB Cable is connected properly.
- Check the condition of the battery.

6. The player works abnormally or does not play

- Click the Reset button and initialize the player.

Bluetooth MP4 Player **A9+**
STORMBLUE

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRE OPERATION.

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
