Re : Antenna Integration PC2

FCC ID : PWG DOLPHIN

Dear Sirs ,

We have integrated 13 dBi panel antenna with the electronics of airBridge Outdoor, airPoint PRO Outdoor, airPoint Outdoor into a new enclosure 180 mm * 180 mm * 60 mm and created new model called airBridge TOTAL , airPoint PRO TOTAL , airPoint TOTAL . The electronic circuit is same as Outdoor models and the change is the integration of the panel antenna into the equipment . Conducted RF output power into the antenna is 17 dBm max , and can be reduced to 11.5 dBm using the Dial – a – Power utility in the software provided

C. J . Balakrishnan
