January 27, 2004

RE: All-Line, Inc.

FCC ID: PWZRE0012

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The confidentiality letter provided should list the specific items (i.e. schematics, etc.) and not the sections for which confidentiality is sought. Please provide an updated letter
- 2) The block diagram provided appears as blank boxes with no information. Please provide a corrected version.
- 3) The data in Figure 3 does not match the periodic transmission description given. Although the current plot provided is necessary to show compliance to the 5 second period, if the device stops transmitting only the current packet upon release of the button, then an additional plot should be added to show the packet length. I believe this plot may have originally been in the first report. Please review.
- 4) The report does not include Table 4, but does include Table 3a and 3b. For consistency, please label as Table 3 and 4.
- 5) The Peak to Average delta for both the fundamental and spurious emissions does not equal the 9.1dB specified in the report. Please review and correct as necessary.
- 6) The calculation for Table 3a does not match the table. Please review/correct as necessary.
- 7) Please explain the odd shape of the plot shown in Figure 6. Is the offending signal mixing with ambient noise?
- 8) FYI....Please upload only the measurement report for the exhibit labeled "Test Report". This exhibit should not include all the internal/external photos, block diagram, etc.

Timothy R. Johnson
Examining Engineer
