Wireless Digital Music Player

[headline]

Liberate Your Digital Music Files and Listen To Them Anywhere at Home

[main text]

Finally, you can enjoy your digital music files and unlimited, worldwide Internet radio, together with your friends and family, in any room of your home. NETGEAR's Wireless Digital Music Player connects your existing home stereo to your home computer network so you can listen to your MP3 and Windows Media® format digital music files -- with great sound quality -- wherever you like to relax and entertain. The Wireless Digital Music Player is compatible with your 802.11b or 802.11g wireless network, and it's very simple to set up and use. Easy-to-install software in one PC automatically finds all your music files on any networked PC. It then collects them into one complete database so you don't have to do the work. Sit back and put your feet up -- remote control and a clear, four-line display let you select music without even getting out of your chair.

[NA version only:] If you like, you can expand your music collection to over 300,000 songs by subscribing to Rhapsody™ Digital Music Service (~~optional, with monthly fee.~~[*free 30 day trial included](#))

[features]

Everywhere You Are

Listen to your MP3s and Windows Media® format digital music files and stream Internet music in the comfort of your living room, away from your PC. With multiple Digital Music Players, you can enjoy music throughout your home, for "whole-home audio."

Easy as 1, 2, 3

Connect the cable to your stereo, install the software on one networked PC, and you're ready to listen! The NETGEAR Media Server automatically finds all the MP3 and Windows Media® format digital music files stored on any networked PC in your home, and [the](#) NETGEAR Media Manager ~~lets recognise~~ your ~~existing organizeorganization your collection~~ by titles, artists, albums, ~~and~~ genres, and ~~create~~ playlists to suit any mood.

Crystal Clear

Hear your music at its best! Enjoy 100% digital, high-quality sound through your existing stereo, boom box, headphones, or powered speakers.

Fully Equipped

Protected with hardware-based Wired Equivalent Privacy (WEP) 64-bit & 128-bit encryption security. Remote functionality means you can easily browse and program your music from across

the room. Gives you remote access to your media player with PC or PDA web interface. Provides Universal Plug and Play™ AV for ready-to-go usability.

[tag line]

Help is there when you need it! NETGEAR provides 24x7 technical support in English with selected local language support during office hours.*

* Free basic installation support provided for 90 days from date of purchase; optional premium support available.

[Certifications?] [CE](#), [FCC](#), [C-tick](#)

[Overseas version] Attention: When you configure the wireless settings of this device please make sure to select the correct country settings. Due to EU law the country settings must be identical to the country where the device is operating (important due to non-harmonized frequencies in the EU).

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.
