

Change description for a C2P

The antenna was changed in order to simplify the production process.

The EIRP is lower in all channels and for both radios (WLAN and GPRS)

The radiated power for all radios is now lower therefore only the radiated power and the SAR could be affected and were re-measured

Power measured:

Device	Channel	Previous conducted output power (dBm)	Previous EIRP (dBm)	New EIRP (dBm)
802.11	1	19.22	20.72	17.89
802.11	6	19.57	21.07	19.31
802.11	11	20.37	21.87	20.39
GSM 1900	512	31.5	26.52	27.3
GSM 1900	661	32.0	27.37	27.2
GSM 1900	810	32.4	27.49	27.17
