

Product Outline

The DWBT001 is the 2.4 GHz wireless LAN transceiver circuit board which uses frequency hopping spread spectrum technology in accordance with the Bluetooth Specification version 1.1. This product is installed only in some specified handy terminals. This product connects the handy terminal with the other Bluetooth devices (i.e. portable printer, personal computer, cellular phone, etc.) without using cable.

Specification of Product

- Product name : Bluetooth Board
- Standard based upon : Bluetooth Spec. Ver.1.1
- Product Type No. : DWBT001
- Frequency range : 2402MHz to 2480MHz
- Nominal output power : 1mW (0dBm)
- Nominal voltage : 3.3 ± 0.3 VD
