Importance: Normal

David, this should be the last issue, unless something else comes up during additional reviews from information submitted. In review of the Power Spectral Density section of the test report I can not determine the full measurement procedure and if it complies with the requirements. Please expand on the procedure used, explain the difference in the Reading and Final Result columns in Figure 63 (which seems to be mislabeled) and review this against the attached DTS Measurement Guideline from the FCC.

Additionally, I think you have titled section 9 incorrectly in the report.

Best regards,

Chris Harvey

David, another issue needs to be addressed. Devices that can be oriented in any axis during operation, such as tags and hand-held devices, must be tested in 3 orthogonal axes per ANSI C63.4. Please be sure that this device was tested in 3 orthogonal axes and either revise the test report or submit a declaration as such.

I will continue to review this application.

Best regards,

Chris Harvedy

Shalom Reuven,
Please issue a letter explaining that the provisions of FC Part 15 Sub-part A Section 15.19 (a) (5) are being used. You should address the letter to the FCC.

I will forward the letter to METLabs.

Hi Chris thank you for the quick response,
I have passed the note on to the customer.
As you suggested, I asked him to include the statement in the user manual.
Do you need a specific request to include the statement in the manual?
I will send you the revised manual as soon as I get it.
Regards

Subject: RE: FCC ID Application AeroScout Tag-Bluesoft

David, a small issue has already arisen. The FCC ID for this device
will be
FCC ID: Q3HBS2030-0. The Label could be a bit better in legibility of
the
FCC ID, but especially the FCC required text per FCC 15.19(a)(3). The
Statement required by 15.19(a)(3) is not complete on the label. Since
this
device is fairly small, you can request that the statement required on
the
device per FCC 15.19 be placed in the Users Manual in accordance with
15.19(a)(5).

Please either revise the label to have the legible and complete
15.19(a)(3)
statement, or submit a request to include this statement in the Manual
along
with the revision to the Users Manual.

I'll continue reviewing this application.

Best regards,

Chris Harvey

Hu Chris,

After consulting with Shaik Raz, we would prefer if you send us any questions as they arise.

Again thank you for your effort.

Regards

David, I have received the files for this application. I will start reviewing this immediately (I see that your customer is in a very big hurry).

Would you prefer that I communicate any questions when the entire application is completely reviewed or communicate them as I have questions (in the interest of time)?

Best regards,

Chris Harvey

Chris/Marianne,

Attached is the subject application.

Attached are the following exhibits/files: FCC Application for
Grant of Equipment Authorization Checklist <<FCC Certification Checklist

Tag.doc>>

Letter requesting
confidentiality <<conf TAG.pdf>>
Label and location <<Label and
location.pdf>>

Agent authorization letter
<<agnet.pdf>>

Schematics
<<BWH2000-02schematics.pdf>>

I will send the rest in a following email : Block diagram

Technical Description

Test set-up photos

E.U.T. Photos

Test report

User Manual
