Experimental Setup

Operating instructions:

1. Place the DUT at the center of the turntable.
2. Connecting the test cable to the DUT, and use the ETS software for passive measurement.
3. During the measured process, ETS-Lindgren will conduct radiation testing with the DUT through by a vertical 360-degree; then the turntable will rotate a horizontal 180-degree.
4. After a complete measurement of spherical 3D is completed.
