Report No. SC301679-03

## 1.0 GENERAL INFORMATION

### 1.1 Product Description

**General Equipment Description -- NOTE: This information will be input into your test report as shown below.**

EUT Description: Wireless Video & Audio Transmitter

EUT Name: Wireless Video & Audio Transmitter

Model No.: TX600/TX618/TX623/TX630 Serial No.: --

Product Options: Input Connectors: LEMO/FCI type or DB15 type

Configurations to be tested: TX630 with LEMO Connector

#### Power Requirements

**Regulations require testing to be performed at typical power ratings in the countries of intended use. (i.e., European power is typically 230 VAC 50 Hz or 400 VAC 50 Hz, single and three phase, respectively)**

Voltage: 12 VDC (If battery powered, make sure battery life is sufficient to complete testing.)

# of Phases: --

Current (Amps/phase(max)): 0.7A Max Current (Amps/phase(nominal)): 0.6A Typ

Other: --

#### Other Special Requirements

--

#### Typical Installation and/or Operating Environment

(ie. Hospital, Small Business, Industrial/Factory, etc.)

Installed on high pole/roof for typical wireless security application.

#### EUT Power Cable

☐ Permanent OR ☒ Removable Length (in meters): 2 m

☒ Shielded OR ☐ Unshielded

☐ Not Applicable

#### EUT Software.

Revision Level: --

Description: --

**EUT Operating Modes to be Tested** -- list the operating modes to be used during test. It is recommended the equipment be tested while operating in a typical operation mode. FCC testing of personal computers and/or peripherals requires that a simple program generate a complete line of upper case H's. Provide a general description of all software, firmware, and PLD algorithms used in the equipment. List all code modules as described above, with the revision level used during testing.  
Consult with your TÜV Product Service Representative if additional assistance is required.

1. The unit shall be tested with the video & audio inputs present. The presence of video turns on the power amplifier at rated power output. The output power is attenuated by at least 23 dB if no video is present.
2. The wireless link is analog FM with the main RF carrier modulated by the video & 2 audio sub-carriers. Maximum deviation is 8 MHz p-p.
3. The firmware resides on a flash memory of the Micro-controller and reads the switches periodically and sets the RF synthesizer accordingly. It also monitors the presence of video to turn on/off the power amplifiers.  
Firmware Rev. No is - 1.6

**EUT System Components** -- List and describe all components which are part of the EUT. For FCC testing a minimum configuration is required. (ie. Mouse, Printer, Monitor, External Disk Drive, Motherboard, etc.)

| Description         | Model # | Serial # | FCC # |
|---------------------|---------|----------|-------|
| Transmitter         | TX630   | --       | --    |
| Antenna             | AX 605  | --       | --    |
| Power cable         | --      | --       | --    |
| Video & audio cable | --      | --       | --    |

**Support Equipment** -- List and describe all support equipment which is not part of the EUT. (i.e. peripherals, simulators, etc)

| Description                  | Model #      | Serial # | FCC # |

|-----------------------------------------------------------------------------------------------|
|-----------------------------------------------------------------------------------------------|

- 1) The enclosure is a milled aluminum with tight control over all mating components.
- 2) To minimize the modulated spectrum from harmonics & spurious signals, both video & the audio sub-carriers are double filtered post-modulation.
- 3) All incoming/outgoing signals are filtered by 'pi' type ferrite filters.

Report No. SC301679-03

## 1.2 Related Submittal Grant

None

## 1.3 Tested System Details

The FCC ID's for all equipment, plus descriptions of all cables used in the tested system are:

None

## 1.4 Test Methodology

Purpose of Test: To demonstrate compliance with the following tests.

| TEST                                    | FCC CFR 47# | PASS/FAIL |
|-----------------------------------------|-------------|-----------|
| Spurious Emissions at Antenna Terminals | 2.1051      | Pass      |
| Radiated Emissions                      | 15.209(a)   | Pass      |
| Output Power                            | 74.636      | Pass      |
| Frequency Stability                     | 74.661      | Pass      |
| Output Power                            | 90.205(l)   | Pass      |
| Bandwidth to be Determined              | 90.209(b)   | Pass      |
| Emission Mask                           | 90.210(b)   | Pass      |
| Frequency Stability                     | 90.213      | Pass      |

Both Conducted and Radiated testing were performed according to the procedures in FCC/ANSI C63.4 and CSA 108.8-M1983. Radiated testing was performed at an antenna-to-EUT distance of 3 meters (1 - 25 GHz).

## 1.5 Test Facility

The open area test site and conducted measurement data were tested by:

TÜV AMERICA, INC  
10040 Mesa Rim Road  
San Diego, CA 92121-2912  
Phone: 858 546 3999  
Fax: 858 546 0364

The Test Site Data and performance comply with ANSI C63.4 and are registered with the FCC, 7435 Oakland Mills Road, Columbia Maryland 21046. All Measurement Data is acquired according to the content of FCC Measurement Procedure and ANSI C63.4, unless supplemented with additional requirements as noted in the test report.

## 1.6 Part 2 Requirements (Remove if Part 15 or 18)

Report No. SC301679-03

## **2.0 SYSTEM TEST CONFIGURATION**

### **2.1 Justification**

The EUT was initially tested for FCC emissions in the following configuration:

See Block Diagram

### **2.2 EUT Exercise Software**

None

### **2.3 Special Accessories**

None

### **2.4 Equipment Modifications**

None

### **2.5 Configuration of Test System**

See Block Diagram

Report No. SC301679-03

#### 4.0 ATTESTATION STATEMENT

##### GENERAL REMARKS:

##### SUMMARY:

All tests were performed per CFR 47, Part(s) 2.1051, 15.209(a), 74.636, 74.661, 90.205(l), 90.209(b), 90.210(b), 90.213

■ - Performed

The Equipment Under Test

■ - **Fulfills** the requirements of CFR 47, Part(s) 2.1051, 15.209(a), 74.636, 74.661, 90.205(l), 90.209(b), 90.210(b), 90.213

Testing Start Date: 22 May 2003

Testing End Date: 27 May 2003
