A close-up photograph of a power supply unit (PSU) component. A large, yellow, rectangular electrolytic capacitor is the central focus, with the text "19F-05" printed on it. To the left of the capacitor is a metal heat sink. Above the capacitor, there are two cylindrical capacitors, one blue and one black, both with "50V" markings. A yellow plastic component with the "VINCIT" logo is visible in the upper left. A metal bracket with the text "UUG-8-ADT3S" is also present. The entire assembly is mounted on a printed circuit board (PCB) with various other components and wires visible.
