RE: FCC ID: Q87-WM54G-I

Attention: Ellis Wu

I have a few comments on this Application.

1. Please note that the device can be either a module restricted to mobile use, or it can be a LMA in a specific type of host. Please correct your modular request letter to reflect modular not LMA (i.e. 'authorization as a modular approval specific to mobile devices such as access points and routers')
2. Please note that the manual states the device operates at 14dBm +/- 1 dB (see page 35 of the manual). The report clearly states that the device is a 19.97dBm and 17.88dBm conducted (see page 6 and 41 of the report. Please make your manual reflect the actual conducted values reported +/- 1dB.
3. Please note that your operational description is not correct. The application is for modular approval, not limited modular approval. Please correct the operational description to reflect the actual application for the device.
4. Please confirm that channels 12 and 13 (those channels above 2462MHz) cannot be software selected by the installer or user.
- 5.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
