Subject: Re : TCB Review Comments for (B06-0517b- Q87-WRT54G3G- Cisco 11g Router w3G card)

Dear Steve,

Thank you for your comments on this application!
We have performed the extra collocation test with 3 typical 3G cards, please refer to submitted test reports.

Thanks!

Best Regards,

主旨 TCB Review Comments for (B06-0517b- Q87-WRT54G3G- Cisco 11g Router w3G card)

[TCB Review Comments for \(B06-0517b- Q87-WRT54G3G- Cisco 11g Router w 3G card\)](#)

-EMC-

Question #1: Per FCC policy, the part 15 WLAN device needs to address the end user specific collocation condition if the device provides an open slot for license radio. Please clarify if this product is intended for working with all license radios available from market or only to certain

specific models? Please supply enough test data to demonstrate the compliance of FCC collocated EMC and RF exposure requirement accordingly.

Best regards,

Steve Cheng
