Dear Sir,

thank you for investigating in the FCC-Approval for the AIS-Transponder
X-Pack DS (OEM-Name: **RM 808 AIS**).

I refer to

Re:	FCC ID Q8Z13EAQ8Z
Applicant:	Nauticast Schiffsnavigationssysteme AG
Correspondence Reference Number:	25555
731 Confirmation Number:	EA494383

Thank you for confirming the receipt of all required material in expected quality.

I hereby correct my first letter about the confidential issue and request to mark the exhibits

block diagrams
schematic diagrams
detailed block diagrams
detailed operational descriptions
parts lists
tune up procedures

as confidential.

The reason for this is the following.

It took Years of development to bring this Product to its actual state. The AIS Market is covered today with a very few number of MED approved Manufacturers. A number of them (also future) would be very happy learning how to set up such a device just by reading our complete Material. It is a pleasure for us, transmitting this data to the FCC, but it would be awful if this is available for others too.

Thank you for your understanding

Andreas Lesch
