TCB:

Hewlett Packard Enterprise Company (HPE) hereby declares that the above-referenced product is professionally installed.

The APINH721 is intended for enterprise-level installations. HPE supports direct sales to large customers and sales via value-added resellers and distributors. There are no retail or mail-order sales channels. In all cases, installation is performed by trained professionals, and HPE/Aruba provides a certified training program.

The complexity of the Aruba OS makes training a requirement for installation and operation. Without training, a user would not be able to perform the initial configuration that is necessary to enable transmission of the access points.

This access point utilizes integral antennas. No external antennas are supported, and no antenna replacement or substitution is permitted. This is referenced in the Installation Guide.
