FCC,

We, Hewlett Packard Enterprise Company, attest that this device under FCC ID: Q9DASIN0307 complies with device protocol requirements and operational restrictions: for client device.

Client Device:

1. Client device (EUT) will not directly connect to another client device.
2. Client device (EUT) will only associate and connect with an indoor Access Point (AP) or indoor Subordinate.
3. Client device (EUT) will always be under the control of an indoor AP. However, there may exist situations where the client may transmit brief messages, prior to being under the control of an AP, to join an AP network. But these brief messages will only occur if the client has detected a signal confirming that an AP is operating on a particular channel. These brief messages will have a time-out mechanism if the client does not receive a response from an AP.
