Introduction

GG301 Bluetooth headset is a light weight wireless headset utilizing Bluetooth wireless technology. The headset contains a microphone and a speaker, and it intended for hands free communications with mobile phones. The headset power is provided by an integral rechargeable battery. The battery must be charged with the supplied charger. There are two versions of GG301, premium type is with 5.7 hours talk time and 266 hours standby time;eco type is with 4.2 hours talk time and 200 hours standby time.

NOTE: Talk time and standby time are varied according to different mobile phones.

Any device that you want to use with GG301 Bluetooth headset must be compatible with Bluetooth cordless technology version 1.1 and support the product and make sure that you:

- 1)** Fully charge your GG301 over night before you use it the first time.
- 2)** Make sure that you pair the headset with your Bluetooth cell phone or other devices before you start making calls.

Thank you for choosing GG301, we hope that you are happy with your choice.

In order to wear the headset, please follow these instructions.

- 1)** Hold the headset firmly and carefully, then turn the speaker housing.
- 2)** Place the GG301 behind your ear.
- 3)** Loop the top of the headset over the top of your ear.
- 4)** Adjust the speaker housing into your ear canal.
- 5)** The microphone will then be position in the direction of your voice.

Prepare to use your GG301 Bluetooth headset

1. Charging and battery time

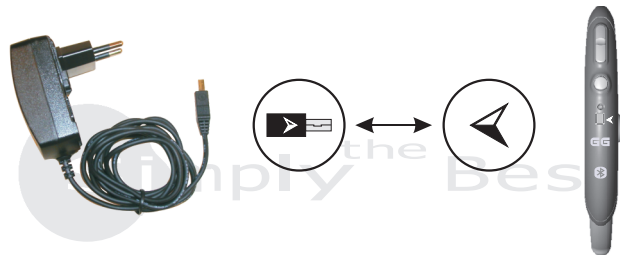

Before you can use your GG301, you need to fully charge the headset's self-contained battery.

NOTE: The headset can be on or off while charging.

If the headset is left connected and charging – it will not over charge the battery.

To charge the headset, please follow this guide:

- 1) Connect the adaptor into an electrical outlet.
- 2) Plug the adaptor's connector into GG301 charging port.
Please refer to the drawing for details.

- 3) While charging, the blue indicator light will stay on and remains lit until the charging is completed. When the charging is completed, the indicators are off i.e. power off.
- 4) Charging time is about 2.5-3 hours.
