

- 5) You can now take the adaptor's connector out from the headset and disconnect the adaptor from the electrical outlet.

2. Linking the headset to the phone (Pairing)

Before you use your headset for the first time, you must pair the headset to a Bluetooth cell phone. The Bluetooth connection between the headset and your phone can be established by setting up a paired link. With a paired link, the phone remembers the headset's ID, and process with future use. Please use the following guide.

3. Pairing the headset to the phone

Before you can pair your headset you need to put it into pairing mode.

Note: Pairing must be done every time while the headset establishes a link with a different Bluetooth cell phone.

Pairing mode can only be entered from the power OFF state. During pairing, it is recommended that the headset and phone distance is as close as possible - with no solid objects in between.

To proceed pairing the headset with the cell phone, please follow this guide:

- 1)** Check the mobile phone user guide, then, find out the locations of Bluetooth and “Bluetooth device discovery” .
- 2)** Ensure GG301 is switched off.
- 3)** Press and hold the Talk button for about 3 seconds, blue indicator blinking 5 times, keep pressing, then blue indicator and red indicator is cross blinking. This means the headset is in pairing mode.
- 4)** Perform a “Bluetooth device discovery” from the mobile phone.

NOTE: It may take several seconds to establish connections.

- 5)** The phone's display will advise that it has found GG301 and ask you to confirm that you want to pair with it. Confirm this.
- 6)** Enter the passkey 1234, when your phone menu prompts you, and the phone will start to pair the headset.
- 7)** Your phone screen will advise that pairing has been successful, and the blue indicator on your headset will flash once every about 3 sec. when Bluetooth pairing has been established.

If the pairing fails, the blue indicator and red indicator keep cross blinking and keep about 60 sec. then stop. A re-pairing procedure is needed. Please refer to above 1)~7).

NOTE: Your phone screen will also give the status. Once the headset and phone have successfully paired – you are ready to place and receive calls.

Turning your headset ON and OFF

To switch your GG301 on, press and hold Talk button for about 3 seconds, the blue indicator lights 5 times, release the button. The blue indicator will be then blinking once every about 3 seconds. This is standby mode which means the headset is awaiting a call.

To switch your headset off, press and hold Talk button for 3 seconds until there are 5 times red indicator blinking, release the button.

Making a call with the headset

There are different ways to make a call using your GG301 as the following description.

NOTE: Make sure the headset and the cell phone are under link stage. For the examples of Ericsson and Nokia cell phones, the ◀▶ and 📞 symbols mean "link" status. For Nokia cell phone, it is necessary to press the talk button once to make the 📞 symbols on the cell phone when the headset is out of 10 meters, power off or after charging.

If your cell phone supports voice dialing, you can use this feature with the headset. Please refer to your phone's user guide for more information on voice control.

Making a call from the mobile phone

- 1)** Place the headset on your ear in the desired wearing style.
- 2)** Using the phone's keypad, dial the phone number.
- 3)** To send the call, press the phone's SEND/CALL key – the phone initiates the call.
- 4)** The call will then transfer automatically to the headset when connection is made.

Note: When making call from Siemens S55 Bluetooth phone, please press the talk button on the headset.

Making a call using voice dialing

- 1)** Voice dialing to your phone must be turned on and voice tags stored.
- 2)** Place the headset in the desired wearing style.
- 3)** Press the Talk button on the headset.
- 4)** A short tone will prompt you and you can speak the voice "tag" name as entered in the phone's voice dial phone book.
- 5)** The phone automatically dials your selection, and you see the details of the call on the phone screen.
- 6)** When connected, you are free to communicate normally via the headset.

NOTE: Please refer to the phone user guide for instructions on storing voice tags.

Ending a call from the headset

To end a call, when wearing the headset – press the headset's Talk button.

Or you can end the call from the phone key pad.

Or when the other side hangs up the phone, the call ends automatically.

Receiving/Answering a call

If there is an incoming call while you are wearing the headset, a ring tone will sound in your headset and just press the headset's Talk button to answer the call.

If you are not wearing the headset, then place the headset on your ear in the normal wearing position and use the Talk button to accept the call.

Simply^{the} Best

If your cell phone supports auto answering a call, the headset will take the incoming call and you don't need to press any button.

Transferring a call

To transfer a call from the phone to the headset, press the headset Talk button. To transfer a call from the headset to the phone, switch the headset off.

NOTE: This could vary according to different cell phones model.

Speaker volume and volume control button

GG301 offers adjust of speaker volume by press the volume up or down button. You can adjust the volume to 15 pre-set levels. Volume up and volume down button will regulate the volume to the speaker in these 15 steps. One step per key press increases/ decreases the desired volume until a satisfactory level is reached. An audible tone is played for each step +/- and when either the minimum or maximum volume has been achieved.
