RE: Class II Permissive Change Request

FCC ID: QAM017

To Whom It May Concern:

Please be advised that pursuant to FCC Rule 47CFR 2.1043 the manufacturer requests that the above-referenced model be approved for class II permissive change.

The reason for this request is PCA modified by increasing pad sizes for connection to Nib Ring and battery. No change to Radio circuitry. During FCC testing tests showed field strength changed but remained within permissible limits. See report TRA-025574-03-47-00A. The change does not affect the performance of the device in service or exceed FCC limits.

Thank you for your attention to this matter.

Yours faithfully

Promethean

Signature

A handwritten signature in blue ink, appearing to read "John Mark Harrison".

Full Name John Mark Harrison. Head of Product Compliance and Certification.
