

Declaration

**We,
Broadcom Corporation**

190 Mathilda Place
Sunnyvale, CA 94086

hereby confirms that the Mini PCI card BCM94309MP (as covered by FCC grant QDS-BRCM1007) will only be sold to Dell Computer Corporation. These cards are intended only for installation into specific Dell laptop computers, which are covered by the FCC grant QDS-BRCM1007.

All BCM94309MP cards sold to Dell have a unique identifier in the SROM. The software pre-installed on all Dell platforms covered by FCC grant QDS-BRCM1007, looks for the unique ID in the card's SROM. In the absence of the correct ID in the SROM, the software will not work.

Dell Computer Corporation is the only company who purchases BCM94309MP with the appropriate unique ID from Broadcom and our contract manufacturer and is the only company with the software that looks for this unique ID number.

Similar provisions (with unique ID numbers) are/will be made for other customers who purchase BCM94309MP from Broadcom. Broadcom only releases our software to these customers through individual secure ftp server accounts, with password protection.

5th June 2003
