This device is a Security System.

You can confirm the Video signal from US(OV5116) by monitor, and

you can store the 32 frames of still images in Flash Memory(K9F4008WOA)

after converting from Analogue signal to Digital signal U11(HI1175) when needed.

When the images are stored, Date & Time stamp will be also showed in top-right corner.

The stored images can be viewed through monitor after converting Digital signal to

Analogue signal U12(HI1171)
