Cover Letter for FCC Application

Please grant our request for FCC certification for a Class II Permissive Change to our 0XB3778 Wi-Fi module utilizing a Murata radio having FCC ID QGH-LB1GC. This request is to add a different external chip antenna to the original certification. Additionally, under FCC rule part 15.247, this module will only communicate in the Wi-Fi domain at 2.4 GHz.

This module is an OEM component radio which is integrated into Leviton products to provide Wi-Fi communications. Since the module is factory installed, there is no user manual and no user changeable parameters by hardware or software. The module will not be sold separately.

The radio will be operated by Leviton proprietary software which has no user changeable parameters affecting the radio functionality.

| Product ID |               |                      | Radio Comparison Information |                 |                              |              |
|------------|---------------|----------------------|------------------------------|-----------------|------------------------------|--------------|
| FCC ID#    | Model Number  | Description          | Murata Chip Model            | External Memory | Antenna Manuf. & Part number | Antenna Type |
| QGH-LB1GC  | 0XB3778000001 | 0XB3778 Wi-Fi Module | LBWA1UZ1GC-069               | 64 Mbit         | Johanson<br>2450AT18D0100    | Chip         |
|            | 0XB3778000003 |                      | LBWA1UZ1GC-901               | 128Mbit         |                              |              |

Sincerely,

Frank Tse
