Antenna Info

- Johanson Technology 2450AT42A100E Ceramic Chip Antenna
 - o Peak gain: 0 dBi typical (XZ-V)
 - o Average gain: -1 dBi typical (XZ-V)
 - o SMD Ceramic Chip Antenna, 2.4GHz – 2.5GHz,
- Typical: Case is SMD 43-1.
- Picture of ceramic chip antennas from Johanson Technology:

- To comply with FCC Part 15 Antenna requirement, the antenna is a printed circuit board surface mount device attached by solder that is not intended to be replaced in the field.
