

2360 10dB 5.8 Ghz Omni Directional Antenna

The 2360 is a vertically polarised high gain base station antenna designed for use in high density RF environments. The excellent radiation characteristics are the distinguishing features of these well priced antennas. The antennas do have a small directional quality and this is high-lighted on the antenna radome. This is useful for preferential coverage areas.

Electrical Specification

Gain	10dB
VSWR	1 : 1.8
Polarization	vertical
Power Rating	100W
Elevation Beamwidth	10 degrees
Cross Pol. Discrimination	26dB min
Impedance	50 ohms
Termination	Fixed N- female

Mechanical Specifications

Length	67cm
Diameter	7 cm
Weight	1.8kg
Windage(at 125mph)	100 lbs
Mounting Pipe	5 cm pipe

Materials

Radiating Elements	Copper co-linear array
Radome	PVC white
Clamps	HDG steel + Stainless Steel Bolts
