

October 19, 2006

This report is in support of an application by Technalogix Ltd. for certification of transmitting equipment used for UHF digital television systems. Specifically, Technalogix is requesting certification of the Technalogix TXUD-150 ATSC compliant digital television transmitter.

The TXUD-150 supplies a 150W average ATSC television signal any of the UHF television channels.

The emission designators based on FCC Part 73.682(d) transmitters are 6M00K1D.

Should you have any questions, please do not hesitate to contact Technalogix:
