STB User Guide

1 Precautions

Safety Instructions:
- The product should be operated only from the type of power source indicated on the marking label.
- Confirm appropriate power and cable connection before powering on the STB.
- The STB has been operating for a long time, STB temperature increases. The measures for heat dissipation:
  - Upon closing or long time unused, disconnect the power cable. Do not pull on the power cable.
- When disconnecting the power cable, turn off the STB and then grip it by the plug.
  - Disconnect the power cable, do not use the power cable or product's cable to avoid damage to the STB or other accidents caused by lightning strikes.

Maintenance Instructions:
- Shield the STB from direct sunlight and keep it away from sources of intense heat.
- Install the STB in a well-ventilated position and avoid humid and dusty places.
- Use a soft cloth to clean STB surface. Never use alcohol, gasoline, or other organic solvent.
- Do not place the STB in any location that is subject to strong pressure, striking, or vibration.

2 Install the STB

Tips on Making Repairs:

- Do not damage the warranty tag when removing the STB cover.
- Do not allow unqualified personnel to remove the STB cover. This is to avoid damage to the internal circuit.
- If repair is required, contact the local service center.
- If parts replacement is required, ensure that service technicians use the parts that are specified by the manufacturer and have the same characteristics as the original parts.

Protection Instructions:

- This product incorporates copy protection technology that is protected by U.S. patents and other Intellectual property rights of Rovi Corporation. Reverse engineering and disassembly are Prohibited.

Precautions:

- Do not connect the unit through a VCR. Video signals fed through VCRs may be affected by copyright protection systems and the picture will be distorted on the television.
- Connecting your TV directly to the Audio/Video output of your STB will assure a more vivid picture and enhance your viewing enjoyment.

Notice:

- Disconnect all cables before attempting to remove the STB cover.
- Disconnect all cables before removing the STB cover. This is to avoid damage to the internal circuit.
- Do not damage the warranty tag when removing the STB cover.
Step 2

Hold down \texttt{Power} (red) on the TV study keypad for 3 seconds.

Step 3

Aim the emission port of your TV remote control at the emission port of your STB remote control (the distance between the two ports must be less than 3 cm), and hold down the Power key on your TV remote control.

Step 4

Press \texttt{Power} to save the settings and to exit the study mode. After that, you can control your TV by using the \texttt{Power} key on your TV remote control.

Possible Cause:

If no signal is received within 10 seconds after your STB remote control enters the study mode, the study mode exits automatically.

Precautions:

- If a signal is received within 10 seconds after your STB remote control enters the study mode, the study mode exits automatically.
- The TV or the STB is in mute mode or the volume is extremely low.
- The audio cable is not properly connected.

Solution:

- Verify that the video cable and network cable are properly connected.
- The TV is in an incorrect mode.
- The STB is powered off.
- The video cable or network cable is not properly connected.

Possible Cause:

If the indicator on your STB remote control quickly blinks three times and then is steady on, your STB remote control has received the signal and the study of the Power key function is complete. Release the Power key on your TV remote control.

Solution:

- Verify that the TV is in the correct mode.
- The remote control is far away from the STB.

Possible Cause:

If you have trouble using your STB remote control to control your TV after performing steps 1 to 4, verify that your STB remote control is working properly.

Solution:

- The TV is in an incorrect mode.
- The STB is powered off.
