Subject: Application for certification
Pages including this page: 1

Dear Sir / Madam,

On behalf of my client T L Parker Ltd I wish to apply for certification of a 470 – 512 MHz transmitter module that has been given the FCC ID QKGRDX-U3.

Certification is requested using 47CFR part 2, section 2.933 – Change in identification of equipment, as a Part 90 device operating as either a Mobile Repeater (section 90.247) or a Mobile Relay Station (section 90.243).

As there have been no changes in design, circuitry or construction clause (b) of this section has been applied.

In accordance with clause (b) the following information is submitted:

- (1) Original identification: AZ489FT5774. A copy of the grant is attached.
- (2) Date of original grant: 21st March 2000. A copy of the grant is attached.
- (3) How the equipment varies from the original: The equipment with the modified identification has not been modified. Attached is a document from the client verifying this.
- (4) Whether the original test results remain representative: The original test results still remain representative as the equipment has not been modified. Attached is a document from the client verifying this. In addition testing of a similar device operating in the 403 – 470 MHz has been carried out by this laboratory which showed that the device continues to comply with a good margin. A copy of this test report has been submitted with the documentation for the device with FCC id: QKGRDX-U1.
- (5) Exterior photographs showing the operating controls and the FCC identification label: See the attached photographs.

Please do not hesitate to contact me should you require any further information.

Regards

Andrew Cutler
General Manager
