

Congratulations!

You have just purchased the most innovative and comprehensive radar/laser accessory available—SmartCord Live.

SmartCord Live uses Bluetooth® technology to communicate with your iPhone® or smartphone using our exclusive app. This combination of technologies gives you access to the most powerful driver alert network—ESCORT Live! (subscription may apply). You can also easily access your detector's settings and manage alerts from your iPhone® or smartphone.

With ESCORT Live!, you and your fellow drivers will instantly communicate all radar/laser encounters automatically, providing the most up-to-date and accurate protection on the road.

Imagine millions of other drivers helping you
Drive Smarter!

Features

You'll still enjoy all the state-of-the-art performance you've come to expect from your detector, but you'll also have access to:

- ESCORT Live!—our exclusive real-time ticket protection network, which warns you of upcoming alerts received by other users in the area.
- Our DEFENDER Database, which warns you of verified speed traps, speed cameras, and red light cameras.
- Our most popular GPS-powered features, including speed-limit data for over-speed alerts, live traffic data for your current location, and TrueLock™ to help eliminate false alerts. You can also Mark Locations for future reference.

NOTE: ESCORT Live! enabled features are only available while running the iPhone or Android application

Connections and Controls

Lighter Adapter

Connects to your vehicle's lighter/accessory Socket

Modular Connector

Connects to your detector

USB Jack

Charges other devices simultaneously

High Speed Charge Selector (underneath)

For high speed charging select the type of device that you are charging from the USB Jack:

1. Apple device
2. Non-Apple device

Power/Alert Light

Blinking blue: *Cord has power but no Bluetooth connection*

Solid blue: *Cord has Bluetooth connection and you are connected to the Escort Live! app*

Blinking red: *Receiving an alert*

Solid orange: *Receiving a locked-out alert*

Mute Button

Push to mute an alert

Push and hold to report an alert when connected to Escort Live!

Push three times to lock out an alert or to unlock a stored false alert

Registering, Downloading and Pairing

Before downloading ESCORT Live!, you must first register your SmartCord Live.

Visit EscortInc.com, click **Product Registration** and follow the instructions to complete the product registration.

1. Enter the App Store or Google Play on your iPhone or smartphone and search for **Escort Live Radar**

2. Follow the onscreen instructions to download **Escort Live Radar** and then open the app
3. When prompted, enter the username and password you created when registering your product at EscortInc.com
4. Press the Settings button then press **Devices**
5. If your SmartCord Live cord is nearby and plugged into your vehicle's accessory outlet then you should see **SmartCord Live** listed with **Not Connected** shown underneath.
6. Press the **SmartCord Live** device entry and when prompted select **Pair**

7. The SmartCord Live **Power/Alert** light will be solid blue to confirm the connection

FCC ID: QKLSCL1

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications made to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
