RE: FCC ID: QKPFC2710

Attention: Yukie Koyama

I have a few comments on this Application.

- 1 Please note that the FCC does not allow mixing CISPR 22 limits and FCC limits. If an EUT is tested to CISPR then the radiated must also be tested to CISPR Limits. Your data shows that conducted was done to CISPR 22 and the radiated was done to FCC limits. Please correct the report to show that all limits are from the same standard either CISPR 22 or the limits listed in CFR47 Part 15.
- 2 Please note that FCC testing must be done in accordance with ANSI C63.4 following the minimum system configuration and diagrams. Please also note that your conducted and radiated emissions testing shows the monitor next to the computer, while the minimum system setup and diagrams show the monitor is to be on top of the Computer. Please provide setup photos that show compliance to ANSI C63.4.
- 3 Please note that this is an ITE and must follow section 11 of ANSI C62.4. This section states, "The monitor should be placed on top of the host, centered and flush with the front of the host, unless the host is not designed for such usage." The EUT appears fully capable of supporting the Monitor. Please either retest with the Monitor on top of the EUT or please explain why you feel the EUT is not sufficiently strong enough or capable of having the monitor placed on top of it during testing.
- 4 Please separate the Confidentiality letter and the Power Of Attorney letter.
